

Outdoor fireplaces, fire columns and wood storage

We produce top quality 'fire products' for use on your terrace or underneath your veranda under the BURNI® brand name. The products can certainly be referred to as quirky, timeless and unique where their designs are concerned. Simply everything you could ever need for a fantastically innovative fire experience. All fireplaces are supplied with a provision for positioning a barbecue grill. This ensures a cosy fireplace can effortlessly be turned into a culinary or quick barbecue. BURNI®'s complete collection is produced using 3mm thick Corten steel. All our products therefore come with a 5 year guarantee. The unconventional design ensures the products also look beautiful when they are not in use. Plus all accessories have been subjected to stringent testing and are all of very durable quality. We can supply all accessories like roof transits, thick walled flues, barbecue grills, spark arresters, rain covers, etc. at competitive prices.

The coated fire places are prevented from rusting, although with extreme heat it is possible after a while there may be a small bit of rust.

Focolari per l'esterno, colonne, panche, portalegna.

AD produce elementi e prodotti di qualità come focolari per l'esterno dalle forme originali e dal design unico. In tutti i forni e camini può essere introdotta una griglia così da trasformarli in un attimo in grill funzionali.

Tutta la collezione è prodotta con pareti di 3 mm di acciaio CorTen ed ha una garanzia di 5 anni. Grazie al design poco convenzionale questi prodotti sono piacevoli da vedersi anche quando non vengono utilizzati. Inoltre questi prodotti sono stati testati a lungo all'esterno ed hanno dimostrato la loro duratura qualità. Tutti gli accessori sono fornibili a prezzi modesti.
