World of Playgrounds

eibe – natural from the start.

This catalogue is printed climate-neutrally on FSC®-certified paper.

For the compensation of emissions generated, we chose the project Ecomapua REDD+, Brasil.

Due to the use of environmentally friendly inks, the catalogue is completely recyclable.

With these measures we want to contribute to environmental and climate protection.

Welcome to eibe
We put your world in motion!
All our play units comply with the
DIN EN 1176
and
DIN EN 16630
standards.

Dear eibe customer,

Your new eibe catalogue shows our motivation at first glance: Better and even more inspiring play equipment with an even stronger focus on sustainability. Wood is not only our main raw material, its versatility and the excellent features inspire us again and again within the design process. In the new catalogue, you will find surprising material combinations which make our play equipment even more exciting. As proven over many years, eibe plays a pioneering role and sets standards in terms of designing innovative and durable playground equipment.

Modularity is one of the innovative design topics of eibe. With our strong and combinable eibe brands, we plan and implement your bespoke project. Our claim is to inspire everyone with unique play worlds.

For us "made in Germany" is a quality claim with content. With eibe you choose products with high manufacturing quality and guaranteed durability.

Besides the presentation of the many product innovations, our catalogue shows you a way to bring the products to life: Only a view clicks and our 3D-Online-Viewer visualises three-dimensional views on your smartphone or tablet.

Wishing you much pleasure with this feature and the new catalogue,

your **eibe** sales team

PS. We are a family-owned company and manufacture exclusively in Germany – a guarantee for best and certified quality!

eibe
What is different about us?
10 reasons for eibe ...

1 Play values

Friedrich Fröbel, the founder of the 'Kindergarten' left the meaningful message:

**'Play does not mean playing around.
It it highly serious and deeply meaningful.'**

The play value is a primary focus of the eibe company philosophy. We want to consider every aspect of true play value and meet all necessary requirements for play equipment: eibe play worlds are valuable in every respect.

The educational demand in play equipment has considerably increased in the recent years. We think this is a good thing for a child-oriented development of future generations. Children learn through play and movement, both support and challenge all essential skills. It is therefore all the more important, that the educational aspect and expert opinion of educators is included in the design concept from the beginning. However, the expertise of those who work daily with our play equipment is just as important for us. An ambitious educational concept and inspired children having great fun with our play worlds, that is our claim.

High material quality and workmanship are equally relevant for the manufacturing of educationally valuable play equipment. From the selection of the best raw materials to a certified manufacturing process - only the best is good enough for us.

The detailed definition of all **play values** you will find **on page 689.**

Inspiring play values!

Evaluating our play equipment in consideration of these aspects shows that eibe can guarantee for high play value.

eibe play worlds stand for:

- → Fitness and joy of movement
- → Social skills
- → Creativity and imagination
- → Motor skills
- → Strengthening of all senses
- → Knowledge and threedimensional perception
- → Joy of experimenting
- → Exploring the elements
- → Relaxing and sense of order
- → Structures of social relations

2 Innovation

Give a child an eibe playground to enjoy and they will be surrounded by creativity, imagination, education and above all - fun. Our colourful, beautifully designed products will inspire and thrill for many years.

eibe the innovator

→ worldwide presence offering pioneering design and unique products

→ ability to add education to fun

→ harmonious blend of innovation and function

→ imaginative concepts and customised design

→ Play areas that inspire and delight!

4 Environment

Through our award-winning Corporate Social Responsibility ethos, eibe is a true 'environmental protection pioneer'. For over twenty years, sustainability has been an integral part of our business strategy, from wood production to catalogue printing, with a host of certificates and award recognition to support it.

eibe protects the environment

- → Our wood comes from sustainable forestry, 100% guaranteed, FSC® certified (COC)
- → Environmental protection is deeply anchored in our corporate philosophy
- → Exemplary 'green' management and environmentally compatible products
- → Ecological-centric production procedures
- → Consistent and continual fair thinking and empathetic action

FSC: The FSC trademarks on wood and wood products stand for transparency and credibility. They guarantee fair and responsible treatment of people and the environment.

EMAS: EMAS is a voluntary instrument of the European Union. It advises and accompanies businesses and organisations of every size and branch to continuously improve their environmental performance.

UMWELTPAKT BAYERN: The Bavarian Environmental Pact is an agreement between the Bavarian government and the Bavarian industry. Voluntariness, acceptance of environmental responsibility and cooperative action are parts of the basic principles. Currently over 2600 businesses are involved in the Bavarian Environmental Pact for sustainable economic activity.

paradiso play unit Marja, solo

>> page 107

Protecting the future

eibe and sustainability

All of the wood we use originates from sustainable forestry.
Just like our finished products, the timber is rigorously tested and certified..

5 Safety

With children's safety a design imperative, eibe insists on the most stringent testing procedures. Security and well-being are essential ingredients in all we do, ensuring you have a reliable and trustworthy partner at all times.

ISO 14001 TÜV SÜD ISO 9001

eibe's safety commitment

→ our equipment is resilient, long-lasting and super-stable

→ safety experts are always on hand to advise and support

→ regular certification and test procedures

→ additional back-up inspections

→ TUV reviewed, so the strictest demands are met

All our play units comply with the **DIN EN 1176** and **DIN EN 16630** standards.

9 Holistic approach

Holistic concepts to ensure the most fun – developed and recommended by teachers and educators:

eibe wants to give children all the time in the world: for socialising, exploration and play. We see our playgrounds as a holistic living space, where children are nurtured and stimulated in a dynamic environment. To create such spaces we update our knowledge in children's developmental research permanently.

Our honest objective: to deliver fantastic play worlds, using the best quality materials, while inspiring children with additional and educational value.
To achieve this objective, we constantly look beyond our own horizons and work tightly together with a team of support specialists in all core areas of the business:

- → **Teachers**
- → **Parents, educators**
- → **Testing institutes**
- → **Architects**
- → **Universities and science labs**
- → **Supporting organisations**

Sitting still was yesterday - the motto of today is: Get out in the playground and embrace nature.

At eibe, we want all children to enjoy outdoor life, to romp around and be wild. This mind-set can stimulate and motivate; it can increase the grey matter. Perception and awareness go on full speed, as children behave and think actively, embracing the free world and filling up their senses. Physical activity breeds a deeper and more profound learning experience; memories and lessons are less likely to be forgotten with active play serving as an integral part of a child's upbringing.

Visit us on **www.eibe.net**

>> page 318

Always with an eye on the Big Picture

eibe is a committed member of various trade associations that aim to make playgrounds safer, more appealing and more conducive to physical activity. As Chairman of the BSFH, eibe's CEO Tilo Eichinger is responsible for the ethos and strategic direction of the association.

BSFH - Federal association of producers of playground and leisure park equipment

The perfect combination

eibe's modular systems mean we can be flexible and adaptable within each product line. This allows greater diversity, ensuring you get exactly what you want...

eibe - diverse and forward thinking

→ creative solutions that produce perfect play

→ strong, recognisable brands with high design standards

→ our consultation, advice and ideas are all included

Affordable yet varied

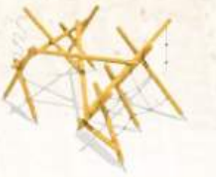
Ideal for public playgrounds, pubs and hotels ecorino is modular and flexible.

Natural and individual

Organic and naturally harmonious, paradiso sits seamlessly in any environment thanks to the individuality of its robinia wood.

Ingenious and impactful

unique is a premium range that comes to life in public playspaces and theme parks. The equipment is of extremely high quality and the products are dynamic and cosmetically stunning.



Inspiration and fascination

This playground concept promises pure inspiration for creative minds. With inventive play equipment and complex combinations, it stimulates children to engage in holistic play.

Athletic and purposeful

Proving that exercise can be combined with fun, active trail is great for climbing, balancing and swinging.

Colourful and delightful

Cute playhouses with vivid colours, minimondo is a toddler's paradise, full of adventure yet perfectly safe.

Active and healthy

For those that are serious about keeping fit, this specially targeted range is aimed at both young and old - ergonomic and safe products for schools, sports facilities and leisure centres.

Education and play

playo is fun personified. With its attractive design and bold colours, the equipment is ideal for nurseries and kindergartens.

Our indoor range for every situation!

Our indoor range for fantastic play worlds! The entire eibe outdoor expertise now available for your indoor playground with even more play value.

Basis

Traditional and popular

The natural experience – with robinia

paradiso encourages children to be at one with nature. The twisted gnarled bark of the robinia wood fits snugly into natural and forest surroundings. It is also packed with play value! With neutral, sympathetic hues, it's a range that will enhance any setting.

> playing, climbing sliding and sand play combinations
> swings, seesaws and spring rockers
> aerial cableways and roundabouts
> exercise and gym equipment
> little playhouses and furniture
> accessories

Robinia is extremely hard-wearing, yet highly pliable. This means that units last a long time and require minimum maintenance.

eibe

For new experiences close to nature

The real uniqueness of eibe's paradiso product range is the individuality of the robinia wood. Not only is it extremely attractive to look at because of its cosmetically pleasing irregular structure, but it is also incredibly tough and resistant to the elements. It can easily withstand half a century of playing!

paradiso has a wide range of products which turn each and every playspace into a magical new world, whether enhancing an existing natural environment or radically transforming an urban landscape.

The motor activity stations reflect different educational concepts like Fröbel, Pikler and others, which respect in particular the personality, individual skill and pace of each child. They encourage the self-initiative of the child and support independent activities. Every unit offers challenges with different degrees of difficulty. Depending on the skill level, each child can chose its own way through the course.

Example installation

Use palisade trunks to partition off certain areas or place them next to other items. Children love to jump over the trunks!

Simply specify the quantity and heights you need

Height <1 m + dig-in depth 60 cm

Height >1 m + dig-in depth 80 cm

For vertical installation

foundation
anchor for robinia trunk

5 45 018 133 00	**Steel**

The Paradiso playing equipment has fresh and natural colours with glazed colours green, brown and oiled robinia.

The paint and oil layers offer additional protection and prevent early greying of the robinia

All colours and oils used are harmless for health and therefore no danger to the children.

unique®

... perfect for public play areas

The innovative world of play

Our premium brand, 'unique', makes public playspace facilities even more fun and creative. Toddlers to teens will love the high quality equipment and natural look and feel of the products.

> Playing, climbing and sliding combinations

> 3D Play panels

> Challenging climbs and crossings

> Rope swings

unique is a modular system that can be easily adapted. Create striking shapes and intriguing angles. Play panels and sensory elements will add to the overall experience.

unique

Consulting. Design. Cost effective.
CONSULTATIONS ON SITE

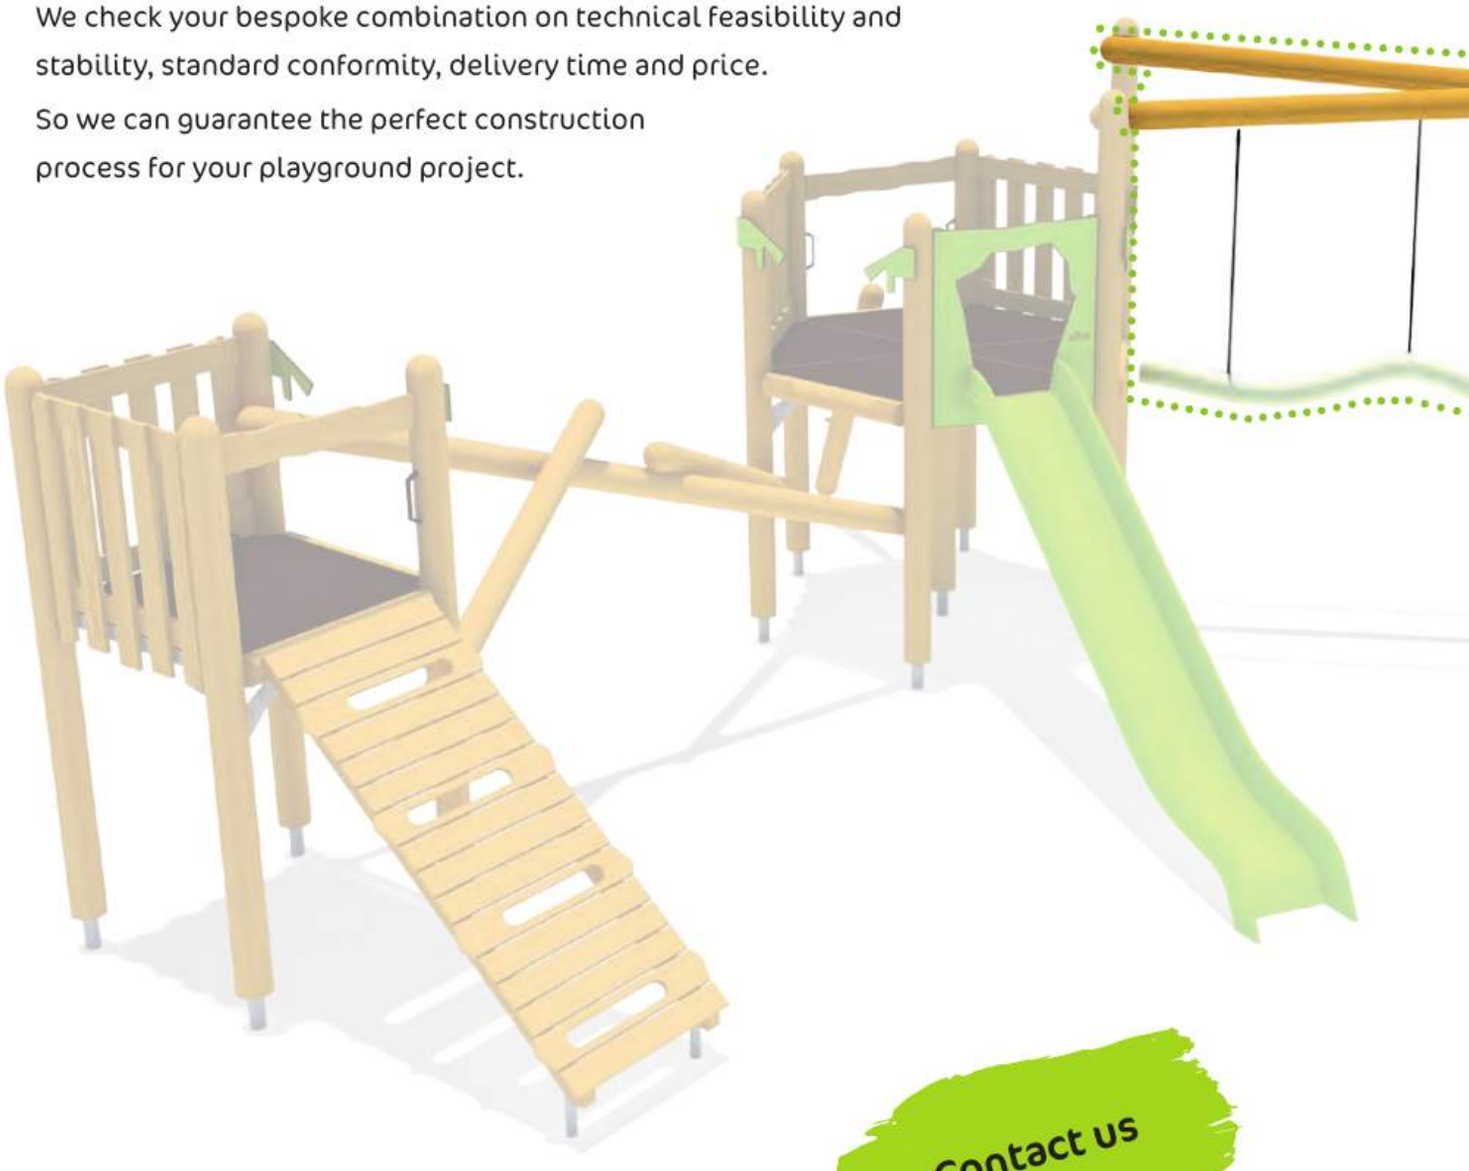
unique

Modularity without limits – individual combinations

Customised standard unit or a complete new play world - we compose your individual play unit!

We check your bespoke combination on technical feasibility and stability, standard conformity, delivery time and price.

So we can guarantee the perfect construction process for your playground project.



Contact us

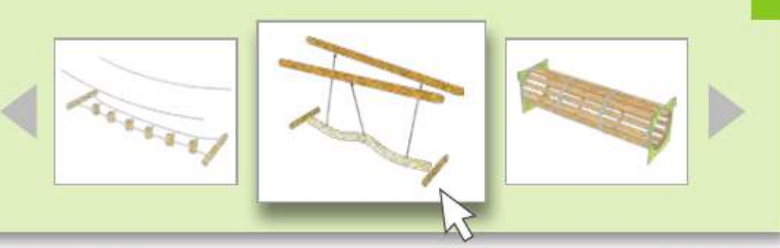
Choose from different themed worlds:

- → Castle
- → Jungle
- → modern

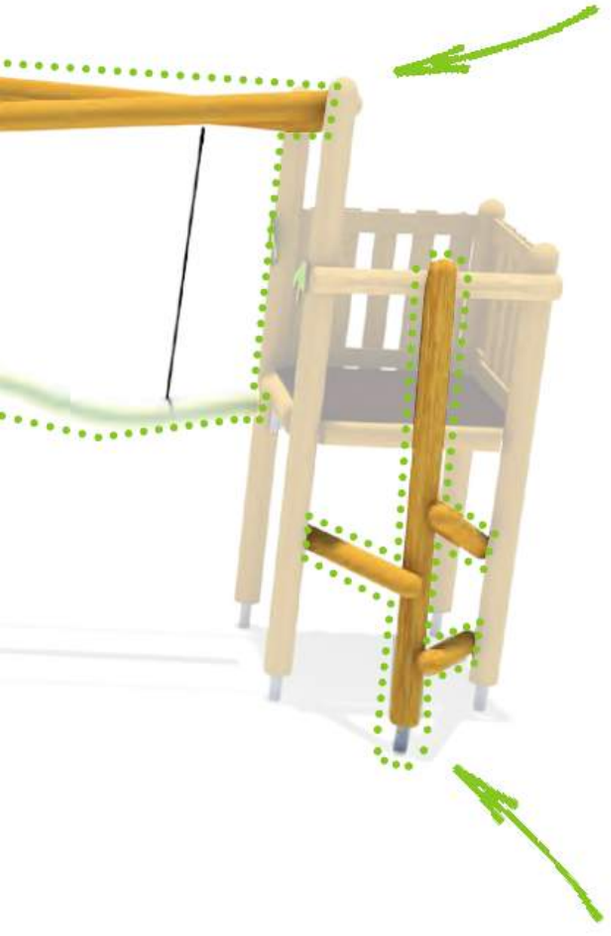
Material

Platforms

Crossovers



Crawling instead of balancing? No problem, choose the crawling tunnel for crossing.

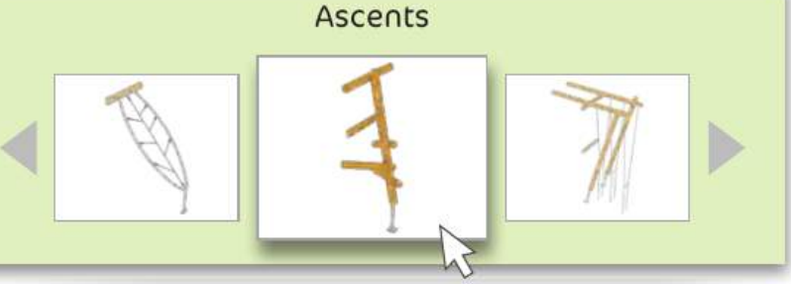


Wall panels

Roof types and shapes

Play panels

Ascents



Replace the log with the ascent of your choice!

Children want to climb trees – or climbo

NEW

Children love to climb trees. It is the feeling of success to reach the next branch fork that makes them grow. This idea gave the design impulse for the eibe climbo brand. The exciting climbo play structure animates children to climb and discover all over the unit. The irregular design and the round wooden posts reflect the versatility and challenges of nature.

- > Play and climbing units
- > Sliding poles, seesaws, nets, ropes, pendulum seats, swirls
- > Varied climbing ascents: V-principle supports risk competence
- > Design inspired by nature: lightness, simplicity, smooth transitions
- > Modern elements like rail slide made of stainless steel
- > High quality processing of timber (constructive wood preservation)
- > Low maintenance due to stainless steel screw connection
- > Easy replacement of spare parts

climbo

eibe

Playfully meet the motoric challenges

climbo®

With our climbo brand children will outgrow themselves - alone or together in a team. Every child will choose his own way whether the easier path or the ascent that takes all the body strength. Decisive are the individual skills and risk tolerance of each individual.

One aspect remains certain: whatever the choice will be, it is a great excitement!

The entire world of climbing in one space and for everyone!

climbo®

Seeking for a place with an over all climbing adventure? Climbo turns it into a reality. The countless combination possibilities guarantee great fun for all ages: from the easy access to the big challenge. Training balance and coordination as well as fostering communication and social skills. The popular eibe play units with their inviting and integrative character, additionally support these effects.

climbo

“Go your own way!”
Stay safe while climbing.

Tricky trails and clever courses that challenge and inspire

eibe's active trail product range includes all **the fun of climbing, jumping and balancing.** But while general gallivanting is encouraged, this range is also great for fitness, developing muscle strength and agility, as well as confidence and co-ordination. Users love active trail due to its simplicity and ease of use. Designed with our children's welfare in mind, **the range is popular with both young and old.**

eibe

activetrail®

activetrail®

An ideal addition to the school yard.

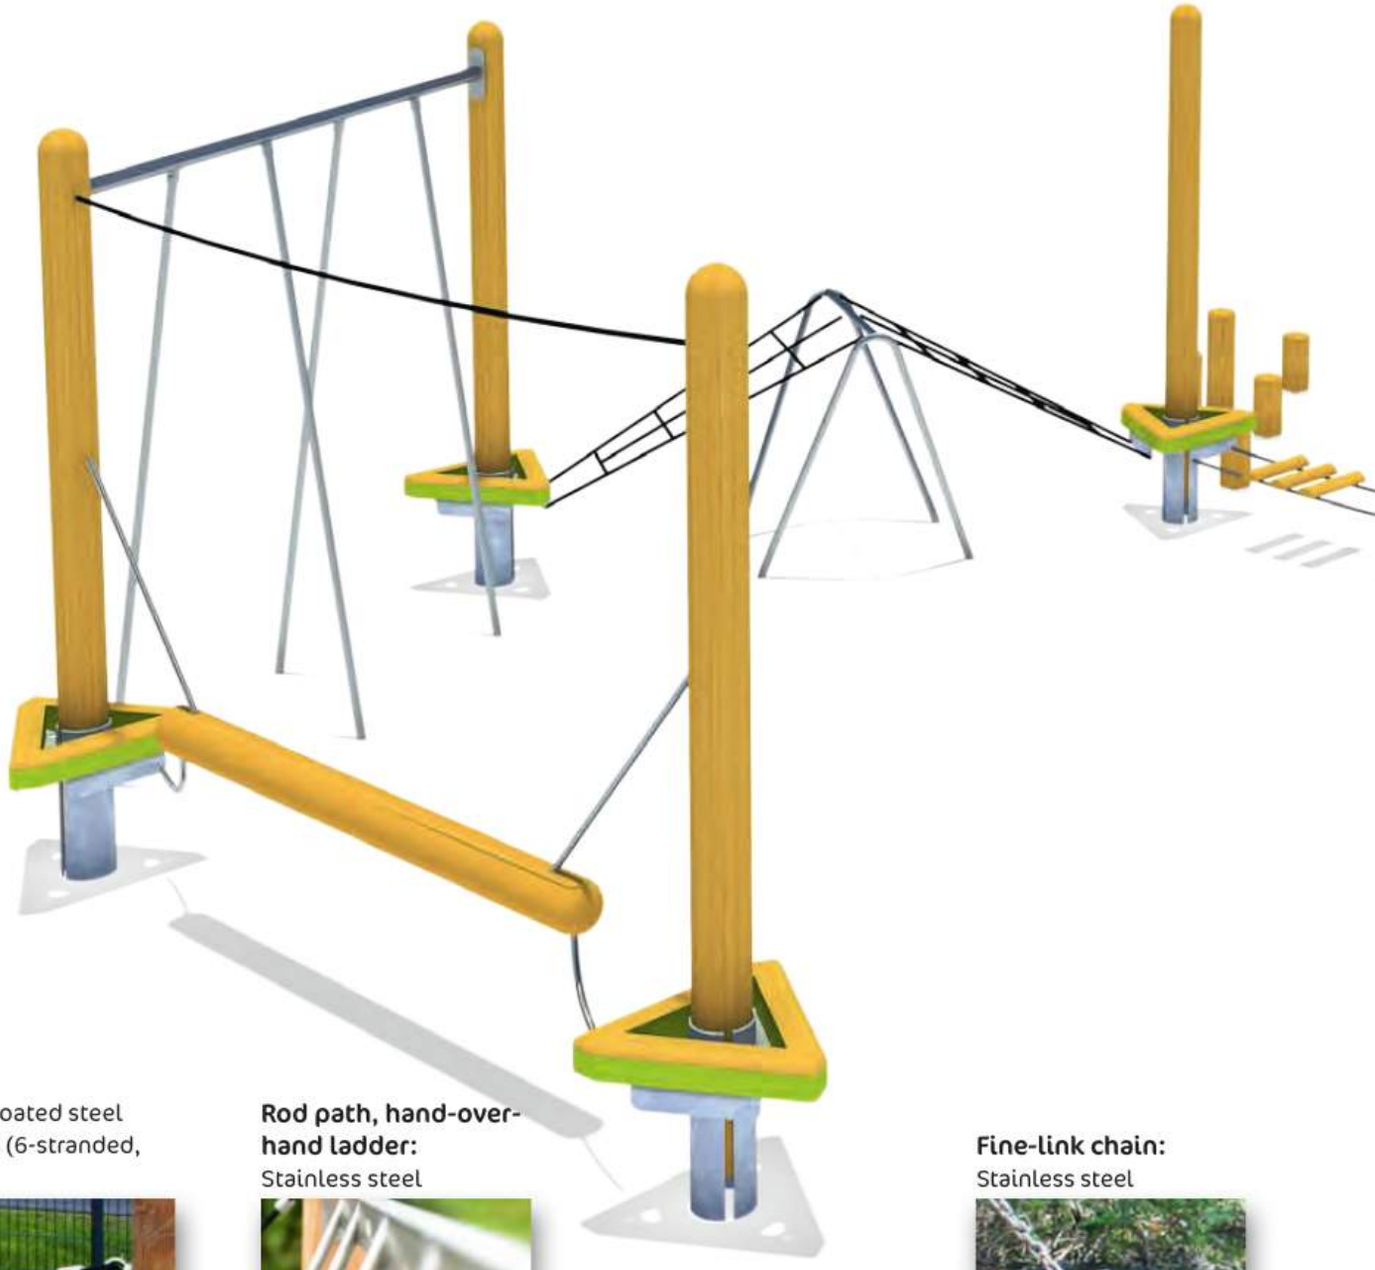
activetrail®

Playing can keep you fit and healthy. “active trail” is all about energy and vitality, promoting motor skills, strength and balance. At the same time, it also encourages social integration and interaction, as well as awareness and patience. As with all eibe equipment, this fun fit range is made from high quality sustainable materials.

activetrail®

Because every detail matters:

Quality components and a design that is built-to-last.



Ropes:
Plastic-coated steel rope PES (6-stranded, glued)

Rod path, hand-over-hand ladder:
Stainless steel

Fine-link chain:
Stainless steel

Innovative, flexible and varied: A whole host of fun for everyone.

There are a myriad of ways to create fascinating playscapes. Using the different islands, it is possible to conjure up your own individual play paradise.

For our detailed **material list** please go to page 675

We'll see you in
the Summer.

The toddler's favorite

Even the very young can enjoy play time independently thanks to the ever-popular minimondo range from eibe. Continually evolving to suit the needs of the increasingly demanding toddler brigade, this delightfully colourful range is a kaleidoscopic Utopia.

- **Playing, climbing and sliding combinations**
- **Swings, seesaws and spring rockers**
- **Huts and furnishings**
- **Accessories**

It is difficult to hide from minimondo's intrinsic cuteness. Bold, vivid playhouses are the ideal hideaway for young children to explore and socialise, raising curiosity and heightening senses. Bright colours and colourful animal motifs add to the magic of minimondo.

minimondo®

An encourageing play world for toddlers

minimondo®

Everybody loves the imaginative nature of minimondo. Great for babies and toddlers, the overriding brightness and design will delight the very young. As important is the safety element - and you are assured of eibe's typically rigorous procedures to ensure that every product within the range has passed the necessary tests and received suitable certification. minimondo will enhance any play area with its seats and retreats and will nurture and encourage development from an early age.

... perfect for several generations

Fresh air and a free mind: The outdoor gym!

"fit" is the eibe brand specifically for sports enthusiasts who love the outdoors. Ideal for public areas such as recreation parks, users can fill their lungs and exercise at the same time on our cleverly designed active stations. Indeed, the whole family can utilise the generation-spanning health equipment.

"fit" is all about diversity and flexibility:

> **Sport.** Including goals, basketball nets and table tennis tables.

> **Fitness.** The revolutionary BodyWeightStation allows the creation of individual training elements.

> **Activity.** The intricate courses contain various stations for holistic support of movement

> **Relaxation.** It's not all about the fitness. Seats and hammocks create a relaxing zone for friends and family.

BodyWeightStation
Pull-Up
page 381

Naturally, all eibe fit units comply with the requirements of DIN EN 16630 for outdoor fitness equipment. eibe guarantees the DIN compliant signage of the parcour and single units. Please note to leave the proper distance to playgrounds. Please find more information about safety, installation and flooring in the installation instructions of the equipment.

fit

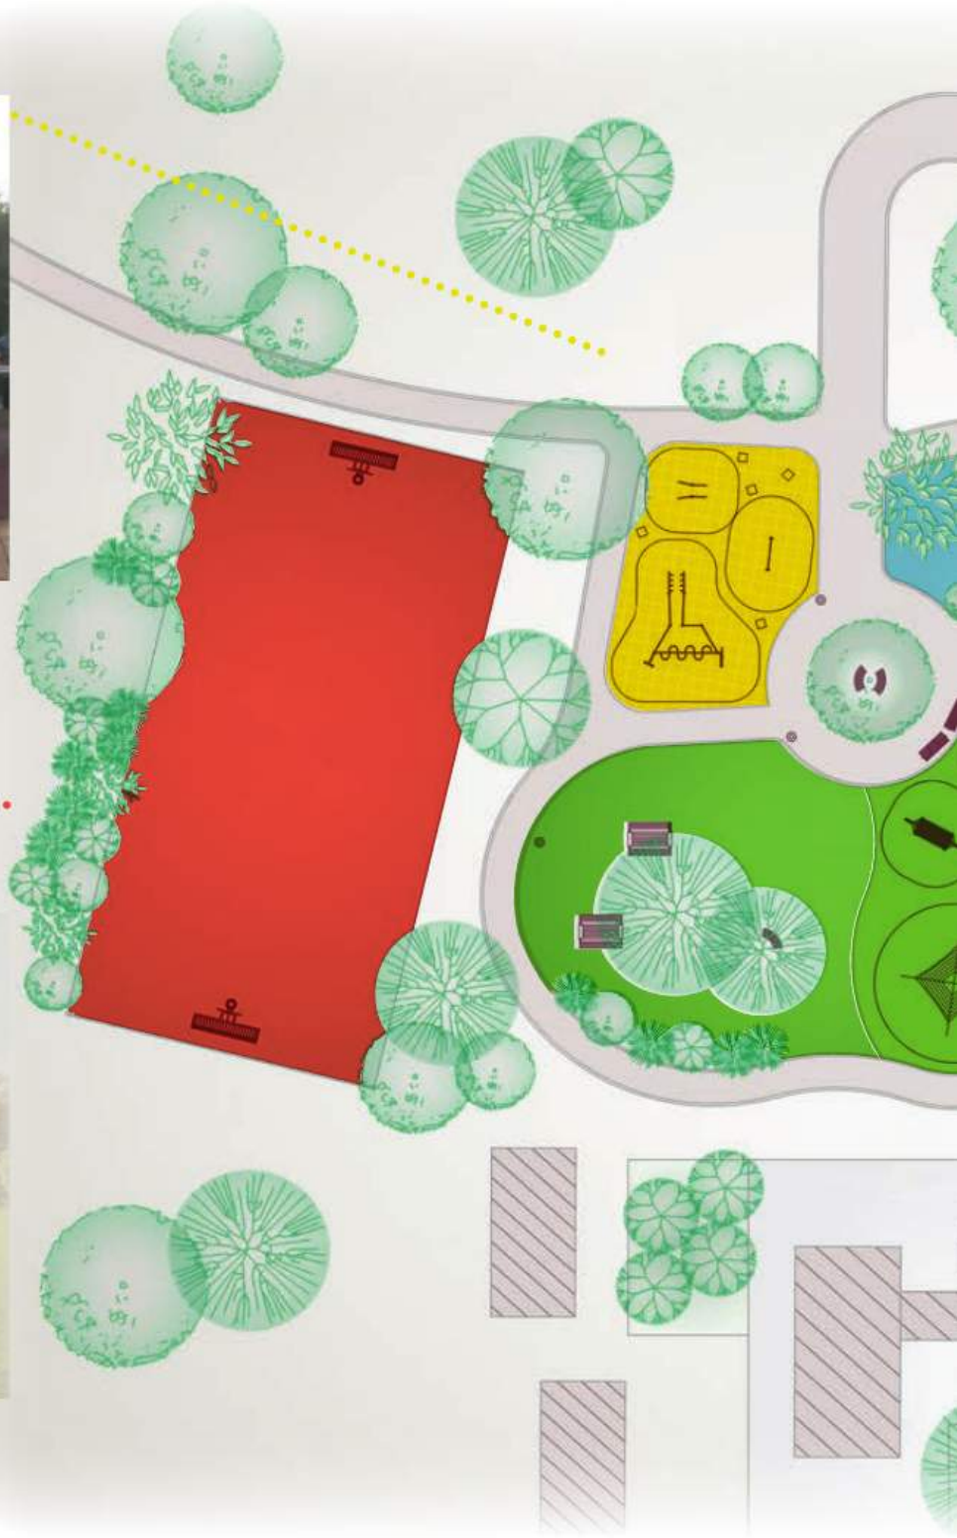
fit

fit

Welcome to fresh air and free space: dynamic movement concepts for all ages.

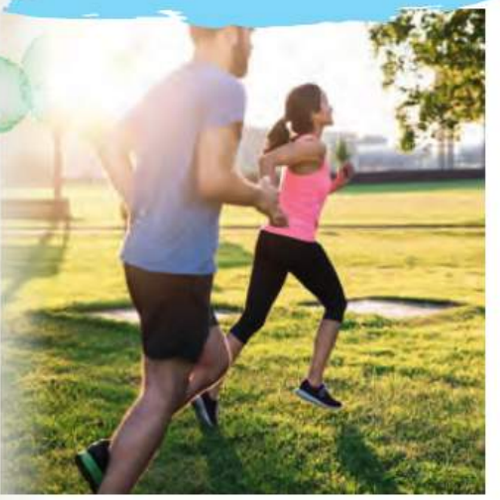
FITNESS

SPORT



Being surrounded by fresh air and lots of space is good therapy for anyone. eibe's 'fit' range gets the whole family outdoors, having fun and keeping healthy at the same time. Depending on individual needs, the stations can be adapted accordingly.

MOVEMENT COURSE



RECOVERY

eibe BodyWeightStation

Bars with different heights

→ For every body size and every training level

→ Pull-ups and preliminary exercises

→ Attachment of add-on parts such as TRX or rings

→ Advanced exercises such as muscle-ups or flying pull-ups

Two parallel bars

→ Heights: 1.2 m & 1.8 m
Length: 1.5 m respective
Width: 59 - 70 cm

English training instructions

Push-up and Australian pull-up tool for

→ Raised press-ups

→ Preliminary exercise for press-ups on the ground - the higher the rung, the easier the press-up

→ Body weight rowing: preliminary exercise for pull-ups

Training sign BodyWeightStation

→ Instructions for different training levels: Basic, Medium, Pro

→ Clear figures, clear instructions

→ Long-lived weather-proof metal material, 50 x 75 cm

Body control, strength building and mobility...the eibe BodyWeightStation is difficult t o beat in terms of versatility

The clever combination of single bars, ladders and grip options, creates a unique outdoor fitness unit, offering perfect conditions for a whole body work-out.

The numerous options for exercise inspire users to approach the station in a challenging yet playful way. This variety motivates sportsmen of all ages e.g. for calisthenics, freestyling, street work-out, TRX and functional training.

Ascending hanging ladder

→ Different grip options - using gravity by moving hand over hand

→ Climb via the wall bars

Fingerboard

→ Climbing training for every level

→ Different grip options (different levels of difficulty)

→ Putting legs on the wall bars

Pull-up bone

→ Different grip options make the pull-up progressively more difficult and improve grip strength

→ Especially popular among climbers

playo®

... perfect for supervised playing areas

Learning while having fun – what a joyful combination!

Design, quality and safety are at the forefront of the 'playo' strategy. With strong colours and classic forms, the range is both functional and fun, amusing young children during break times and after school.

- **Playing, climbing, sliding and sand combinations**
- **Swings, seesaws, spring rockers and cableways**
- **Huts and Furnishings**
- **Accessories**

The sophisticated design and attractive layouts of playo have entertained children over many years. But we don't stand still; the range is evolving all the time and new products continue to fill the pages of our catalogue, all containing the sensory elements that have proved popular in the past.

To the playground,

ready, set, go!

The multifunction aspect of playo is what makes it ideal as a play option. It has so many levels. Exciting ascents, cosy retreats, wobbly bridges and challenging climbs - all add up to a bundle of fun. There is a focus on emotional and social development too; colourful play panels encourage haptic development, adding to the whole sensory experience.

Modularity without limits – individual combinations

Customised standard unit or a complete new play world – we compose your individual play unit!

We check your bespoke combination on technical feasibility and stability, standard conformity, delivery time and price.

So we can guarantee the perfect construction process for your playground project.

Contact us

Choose from different themed worlds:

- → Maritime
- → Construction Site
- → Jungle
- → Farm
- → Fire brigade
- → Castle

You would like **different play values**? Choose from an almost endless selection!

You would like an **easier crossing**? Simply replace the wobbly bridge with a **suspension bridge**!

- easy cleaning
- UV protection, UV filter 10-20
- no mould stains
- permeable to water and air

Our sun awnings are truly multitalented! They are a perfect sun protection from dangerous UV radiation. Further more the awning is a practical sand pit cover. By easy lowering to ground level, it protects from contamination of leaves, bird droppings or animal excrements.

The trend of today – Indoor play units made of wood

Attractive indoor play units are strongly demanded. No matter what the weather does outside, the family excursion to the next indoor playground always guarantees great fun and high spirits. **With eibiniland you invest in an indoor playground with exceptional diversity and quality.** Operators of indoor playgrounds know that playground equipment made of wood instead of plastic is highly relevant for visitors. eibiniland presents the perfect invitation for playing:

- **Indoor equipment**
- **Extension elements**
- **Impact attenuation tiles**
- **Cushion elements geoform**
- **Activating play materials**

Almost like farm holidays!

eibiniLAND®

The advantage of eibiniland themed play units is their creative basic design concept which appeals to children of all age groups. Exemplary is the consideration of basic areas for all needs: movement and relaxing zones, meeting points and activity areas. eibiniland is ideally suited for the design of rustic-style play worlds and inspires with the simplicity of the design. Equip your indoor play world with inspiring play fun made of renewable raw materials.

eibiniLAND®

Let the knights games begin: **Roping to one's heart's content, thanks to high-quality materials.**

Modularity without limits – individual combinations

Customised standard unit or a complete new play world - we compose your individual play unit!

We check your bespoke combination on technical feasibility and stability, standard conformity, delivery time and price.

So we can guarantee the perfect construction process for your playground project.

Contact us

Choose from different themed worlds:

- → Maritime
- → Construction Site
- → Jungle
- → Farm
- → Fire brigade
- → Castle

You do not want an **obstacle**? Simply replace the platform element with a **mirror platform**!

You would like to replace the mountaineering ramp, choose your favourite ascent from a wide selection!

The bouldering wall is an additional part of our portfolio and can be installed almost anywhere. The modular system can be expanded at any time and the basic construction consists of hot-dip galvanised steel tubes. 3cm strong climbing plates made of polymer concrete are attached to the supports. Because of the textured surface the wall has a boulder optic.

Boulder Climbing Wall made of Polymer Concrete: vandalism-proof, extremely stable, weatherproof, safe, mobile and climbable from both sides.

Please note: in order to be able to ensure a quick and problem-free delivery, the site must be able to be accessed by a large truck or a forklift with a lifting height of 4.5 metres that has to be already present on-site.

2 elements with 48 climbing grips

Boulder wall concrete, Type II

Info box

Minimum space:	480x300x284 cm
Free falling height:	251 cm
Impact protection net:	36,0 m²

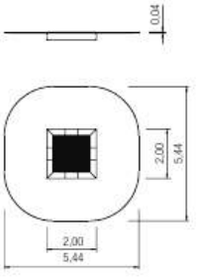
Floor trampoline Kids Tramp playground 200x200 cm

Info box

Minimum space:	544x544x100 cm
Free falling height:	>100 cm
Impact protection net:	25,0 m²
Foundations:	

5 62 101 0 **Wire-reinforced belt material, steel springs, rubber granulate**



A real highlight for your playground or school yard.

Your benefits at a glance - playground:

* suitable for playgrounds, GS certified (DIN EN 1176-1:2017)
* highest safety and quality standards
* suitable for use in non-supervised play areas
* promotes the development of coordination and motor skills
* vandal-proof thanks to the wire reinforced belt tissue
* hardly flammable jumping mat
* all components are heat and UV light resistant
* easy transport and installation, with instruction video
* 100% made in Germany for more than 50 years
* perfect for combination of several trampolines
* ideal for wheelchair users as well thanks to the rounded edges

Spring rockers that make you jump with delight!

Impact protection, Slides, Accessories, Spare parts

The roundabout for the whole family - children, parents & grandparents

- Three different swirls, with different degrees of difficulty offer the suitable challenge for every child.
- Climbing net, rope and pendulum seat add additional play fun.
- Due to the high-quality bearing, it takes only the strength of two children to set the roundabout in motion.

Please note that this equipment should be installed by professional assemblers trained according to the EN 1176. In case of any uncertainties, please contact your safety inspector for playground safety. In case the equipment is not installed in accordance with the safety standard, hidden dangers to life and limb may arise, e.g. strangulation, entrapment of head or impact and head injury caused by excessive heights of roofs or lack of impact protection under the play equipment. Contact us for safe installation by our experienced eibe assemblers.

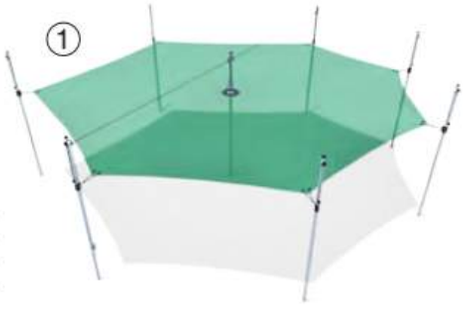
②	5 59 133 0 29	PE blue
	5 59 133 0 30	PE terracotta



- HDPE fabric
- 75-85% opaque
- 75-90% shading
- dirt, mould and decay resistance
- high tear resistance
- no heat accumulation
- easy cleaning
- UV protection, UV filter 10-20
- no mould stains
- permeable to water and air

Our sun awnings are truly multitalented! They are a perfect sun protection from dangerous UV radiation. Further more the awning is a practical sand pit cover. By easy lowering to ground level, it protects from contamination of leaves, bird droppings or animal excrements.

An amazingly simple system – pre-assembled seat and table surfaces are bolted to round, wooden palisades: The special design of the seat and table surfaces allows you to arrange seats and tables according to your individual requirements and available space – either upright or to an angle of up to 45°.
Additional charm is provided by including our eibini figures in the system. These can be used as posts as with our rounded-head palisades.
The eibe rounded-head palisades for seat and table heights are supplied with ground anchors and screws, and can be bolted to foundations.

Overview of foundations for all spring rockers!

For information on the required number of ground anchors, please refer to the info box of each spring rocker.

Can also be used as ground anchor 1

Concrete foundation for spring rockers

All eibe basic spring rockers are securely mounted with their concrete-prefabricated baseplate. The attachment screws for the spiral spring are pre-set in concrete.

5 59 160 0 Concrete

Ground anchor 1 for spring rockers

The spring rocker is attached on a stable ground anchor with a baseplate made of corrosion-proof steel. We strongly advise that eibe basic spring rockers which are in frequent use should be set in concrete.

5 63 210 0 Steel

Ground anchor for spring rockers 2

5 63 228 0 Steel

The eibe swing joint was successfully tested through 500,000 cycles. According to the standard, only 100,000 cycles are required.

This product is covered with a maintenance-free synthetic friction bearing. The eibe swing suspension is galvanised or stainless steel and fastened with two screws.

eibe
complete inspiration

eibe material list

Best quality requires high-quality raw materials

Natural wood

Our wood is 100% FSC® COC-certified, core-separated, dry, matured and from European stocks. This ensures fewer cracks and therefore reduced opportunities for attack from wood-destroying fungi and insects.

Our coat polish and cut round heads reduce the risk of injury from splinters while at the same time improving constructional wood protection by a surface that is more pleasant to the touch.

FSC
www.fsc.org
FSC® C116645

The mark of responsible forestry

splinter and core-free

coat polish

round head

Pine/spruce

pressure-impregnated (PI)

Pressure-boiler treated using wood protection agents that are harmless to the environment and to health.

common impregnation

pressure-impregnated

Hazard class:
3 - no direct earth contact
Durability class:
untreated 4; treated 1-2
Protection from:
Insects/beetles:
Pressure-boiler treated (KDI)
Fungi:
Pressure-boiler treated (KDI)
Hygroscopicity:
Core-free woods, even at large dimensions, minimised cracking

Larch

Glue-laminated timber (GL)

The surface of our laminated boards is treated with a transparent wood oil certified to DIN EN 71-3, which pleasantly highlights the natural grain of the wood. Water-proof lamination of individual boards according to DIN EN 14080 into a large cross-section ensures dimensional stability (no distortion, cracking, etc.).

Hazard class: 3 - no direct earth contact
Durability class: untreated 3
The slats are generally low-splinter.
Weather-resilient glue D4 for structural applications outdoors according to EN 301 type I
Protection from:
Insects/beetles: impregnated (oils)
Fungi: impregnated (oils)
Sunlight: impregnated (oils)
Hygroscopicity: no cores in the outer slats

Larch

Fine-grained larch with high raw density from sustainably managed forests ensures long service life and joyment of the play equipment.

Hazard class: 3 - no direct earth contact
Durability class: untreated 3
The slats are generally low-splinter.
Weather-resilient glue D4 for structural applications outdoors according to EN 301 type I
Protection from:
Insects/beetles: impregnated (oils)
Fungi: impregnated (oils)
Sunlight: impregnated (oils)
Hygroscopicity: no cores in the outer slats

Robinia

Splinter-free, naturally durable robinia core wood with a natural, organic appearance and a long lifetime which are beneficial features applicable to all target groups. Our robinia wood is enhanced with environmentally friendly oils based on naturally grown raw materials, reviewed according to DIN EN 71-3.

Hazard class: 4 - direct earth contact
Durability class: untreated 1-2
Generally only splinter free. (Splinter is resistance class: 5) Tends to form cracks.
Cross-screw connection may minimise cracks.
Protection from:
Insects/beetles: natural protection, except for termites
Fungi: natural protection
Sunlight: Oil, coloured or transparent
Hygrocscpicity: -

Eucalyptus

Our laminated eucalyptus wood board with a raw density of > 800 kg/m³ can deal with the high stresses of everyday use. It also ensures unusually long durability and sustainability. The wood is enhanced with environmentally friendly oils based on naturally grown raw materials, reviewed according to DIN EN 71-3.

Hazard class: 3 - No direct earth contact
Durability class: untreated 2
The lamellas are generally low-splinter.
Weather-resilient glue D4 for structural applications
outdoors according to EN 301 type I
Protection from:
Insects/beetles: natural protection, except for termites
Fungi: natural protection
Sunlight: Oil, coloured or transparent
Hygrocscpicity: -

Wood preservation agent/colour

We use only high quality paint and waterproofing systems from German suppliers in accordance with the following standards:
● DIN 53160 Sweat and saliva fastness ● DIN EN 71-3 Safety of toys; migration of certain elements
● AFPS GS specification – free of polycyclical aromatic hydrocarbons (PAK) ● continually reviewed by our certified quality and environmental management certified to ISO 9001/14001. ● Our company is EMAS-certified.

Oil

Our caring wood oil is weather-resilient, glazing and moisture regulating. It penetrates the wood well and thus ensures very good run-off properties of water and minimised fibre straightening during treatment.

Colour treatment

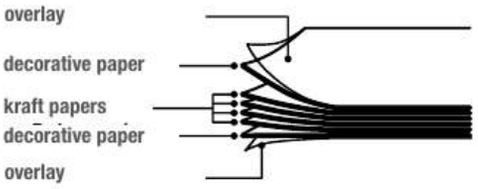
The optimised triple combination of ingredients coordinated with wood protection has a long preventive effect against blue and wood-destroying fungi.

Saturation of the surface during the paint system ensures an even colour pattern and prevents staining. The alkyd binders modified at high quality counter moisture intake and stabilise dimensions this way, which verifiably reduces dimension changes in the wood. The risk of cracks and distortion is minimised. Application of colour pigments blocks the entry of UV light. This maintains the fresh and colourful effect of the design concept, which improves the play value.

Impregnation

Wolmanit® CX is a liquid, chrome-free wood protection salt based on inorganic copper and boron compounds and organic active substances with preventive effects against wood-destroying fungi, including soft rot, and against wood-destroying insects, including termites. A comprehensive series of international testing confirms the effectiveness of Wolmanit® CX. Wolmanit® CX is based on the active ingredient copper HDO, a fungicide that has been successfully used in wood protection for many years and that is one of the best-examined wood protection fungicides in the world. The aqueous Wolmanit® CX-products are hard to wash out, weather-resilient and environmentally friendly following application to the wood.

HPL panels 15 mm/6 mm High Pressure Laminate



Laminates are made of several layers of paper with resin coating that have been joined under high pressure (based on thermally curing resins, homogeneously reinforced with wood fibres)

HPL panels are extremely resilient by high tensile and binding strength with the necessary levels of elasticity. HPL is also absolutely impact resilient. The homogeneous core ensures high resilience against pulling out of attachments. This makes it outstandingly suitable for use in vandalism-prone areas.

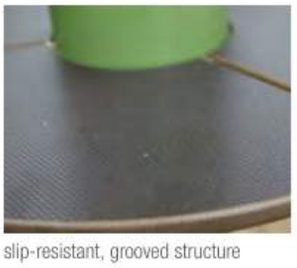
Dirt will not easily accumulate on the pore-free surface, which does not require treatment or care. Even graffiti can be removed without residue with suitable solvents, without attacking the surface. The panels can be cleaned with conventional cleaners.

HPL panels contain no organic halogen (chlorine, fluorine, bromine, etc.) compounds, asbestos or wood protection agents (fungicides, pesticides, etc.). They are free of sulphur, mercury and cadmium as well as other heavy metals.

climbing panels

water play unit

slip-resistant step



slip-resistant, grooved structure

large sample board

HDPE panels

19 mm (high density polyethylene)

Polyethylene is very versatile and impact-resistant, very resilient against acids, alkalies and other chemicals. Polyethylene barely absorbs any water and has a relatively high density between 0.94 g/cm³ and 0.97 g/cm³.

Makrolon

(polycarbonate)

Polycarbonates are characterised by high strength, impact resilience, stiffness and hardness and thus are not very susceptible to vandalism. There is no risk of splinter formation at moderate impact energies and speeds. Polycarbonate is much lighter in weight than glass.

Acrylic glass, Plexiglas

(polymethylmethacrylate) Polymethylmethacrylate transmits light better than mineral glass, can be easily coloured, is resistant to weather and ageing.

Impact attenuating tiles

of EPDM (ethylene-propylene-diene-rubber)

Our fall protection panels have been inspected and certified to DIN EN 1177. Children can safely play as wildly as they like. Fall protection panels offer effective protection when children jump or fall off of play equipment, reducing the impact.

Of course, our fall protection panels are free of PAK (polycyclical aromatic hydrocarbons) and thus safe for the health of children.

Metal

We use metal parts where constructional or static strength and resilience requires this material. Use of metal fixings permits more interesting structures than this would be possible with pure wood fixings. Many parts, such as climbing and sliding poles, ladders or hand-over-hand ladders, would be impossible to implement in wood.

Stainless steel

We use V2A stainless steel (1.4301). Overview of the advantages of stainless steel:

● corrosion-resistant ● temperature-resilient ● conductive ● weldable ● hygienic ● low-maintenance ● long-lived

The surfaces are shot-peened (e.g. stainless steel slides, sliding rods), stained (e.g. fittings, small parts) or electro-polished (e.g. GFRP-slide with VA lining).

The purely metallic, and thus slow-reacting surface prevents discolouration and formation of deposits to ensure an attractive and, depending on polishing degree, brilliant look.

Steel

We use steel S235JR.
All parts are carefully processed, deburred and surface-treated depending on requirement: Small parts are galvanically zinc-plated, larger parts are hot-dip galvanised and powder-coated if necessary.

hot-dip galvanised

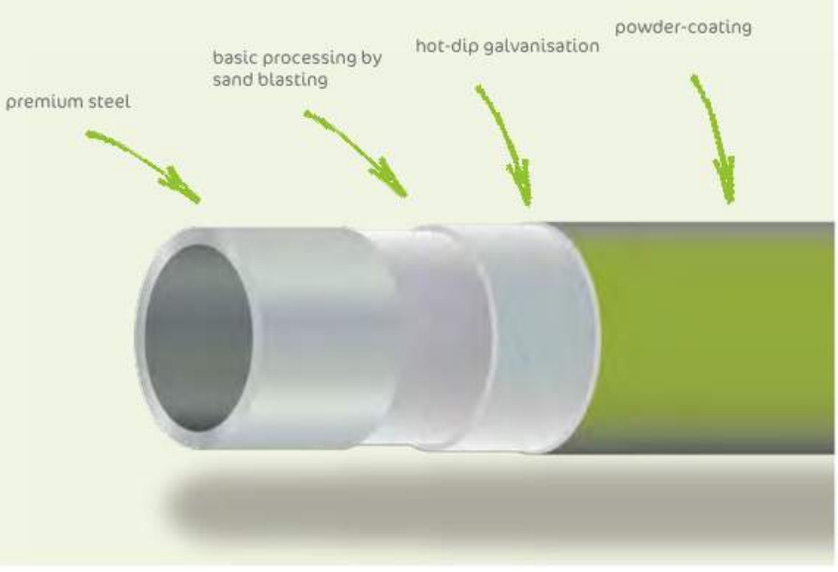
hot-dip galvanised + powder-coated

Duplex system - hot-dip galvanised and powder coated

Duplex systems are consist of hot-dip galvanisation and powder coating. The essential benefit of Duplex systems is the high protection duration that is much longer than the total of the respective individual protection durations from zinc-plating and coating.

The most essential properties include the long corrosion resilience as well as, e.g., diffusion density, UV-stability, alkali resilience.

The individual layer thicknesses for zinc-plating are at least 80 – 120 mμ, and for powder coating 60 – 90 mμ.



Attachment parts

Chains

For our chains, we use mostly non-corrosive fine-link stainless steel chains of welded chain links (diameter 6 mm). The stainless steel chains are mostly used where children take the chains in their hands, e.g. in sand lifts and swings. When chains are used as a carrying element (e.g. for wobbly transfers), we use even harder, corrosion-resistant fine-link chains of galvanised steel. This ensures best resilience and resistance.

stainless steel chain

Galvanised steel chain

Ropes & nets

We use a 6-stranded steel rope coated in polyester (PES) for highest stress at concurrent maximation of safety by low water intake, low sand integration, very high UV resilience, good abrasion resistance and very high yarn strength. One-part plastic connectors reduce the risk of nets breaking. Nets are connected to wood parts using high-quality stainless steel ring nuts and stainless steel thimbles or full plastic thimbles.

Rope cross-section

Plastic connector

stainless steel thimbles

Tibet rope

Our Tibet rope is a square mesh at a diameter of 140 mm, made of polypropylene. It has a steel wire core for high flexibility and strength and a low weight.

Coil springs

Our hot-dip galvanised spiral springs with a diameter of 19 cm are protected by a zinc-phosphating and UV-resilient polyester powder coating in RAL 9007 grey aluminium. This ensures long durability even at dynamic stress.

Hot-dip galvanised ground anchors for ground installation

The ground anchors are made of hot-dip galvanised steel for high corrosion protection and prevent direct contact between the wood and the connecting soil. The different installation depths permit adjustment to any situation on site. The anchors are glued into the wood from below, prevent accumulated moisture and ensure long service life with maximised resilience.

Swing suspension

The suspension for safety-swing seats of hot-dip galvanised steel or stainless steel with maintenance-free plastic plain bearing. The swing elements provided by eibe have been tested successfully in 500,000 swing cycles.
This is five times the required value: The joints therefore are long-lived, maintenance-free and safe. When installing cardan joints, an additional chain in hot-dip galvanised steel or stainless steel further improves safety.

stainless steel

Multi-point suspension

Safety chain

Junctions

Angle coupling

In our "unique" product line, hot-dip galvanised steel frames ensure the best stability and safety in conjunction with a modular approach that can be scaled up or down. This ensures simple assembly and lower setup costs.

Railing angle, platform angle, fittings are entirely made of stainless steel in our "playo", "ecorino" and "unique" product lines. This high-quality and extremely long-lived material will justify your investment.

Bolted connections

ecorino, paradiso, unique and playo only use stainless steel screws;

all structural connections are screwed on permanently.

The tannic acid of the robinia reacts with galvanised parts. Therefore, we use only stainless steel screws and fittings for our robinia timbers.

Finished footings

eibe prefabricated foundations are available in 3 sizes depending on structural requirements: 16 kg, 45 kg and 380 kg. This ensures best stability. The installation times are considerably reduced and will providing value for money for you. It is not necessary to use temporary fencing to secure the playground while, for example, in-situ concrete foundations have to cure. When using prefabricated foundations, the equipment can be played on at once. No construction sites need to be secured! Disassembly of devices (e.g. due to location change) is possible quickly and cleanly as well.

eibe seal of approval

In addition to general information, the eibe test seal contains all information specified by the standard, such as the year of build, the indication of the standards according to which the system is to be reviewed, the item number, and the clear confirmation number.

This way, spare parts can be provided and delivered precisely for your system.

slides

GFRP – Glassfibre-reinforced plastics (polyester)

The GFRP material with ecological characteristics is not only recyclable but also extremely impact resilient, weather-resilient and resistant against UV rays. We use much stronger designs than many other competitors, in particular those designed for public areas.

We use innovative test methods to ensure quality and safety. The products are regularly inspected for deformation, break resistance and environmental impact.

Our GFRP parts are statically and dynamically highly resilient - in spite of their low weight.

GFRP slides with stainless steel lining

For our GFRP slides with stainless steel lining, we use the same GFRP components as for our slides completely made of GFRP.
In addition to this, the slide surface is lined with premium polished stainless steel; this may clearly increase usage duration of a highly frequented slide.

Stainless steel

We use high-value stainless steel. This ensures a long life while providing high resilience. The purely metal, and thus slow-reacting surface prevents discolouration and formation of deposits to ensure an attractive and, depending on polishing degree, brilliant look.

The surfaces are shot-peened, iron-free and chemically neutral.
Stainless steel parts from container and device construction receive an even, silk-gloss surface by blasting.
The material thickness is at least 2.5 mm.

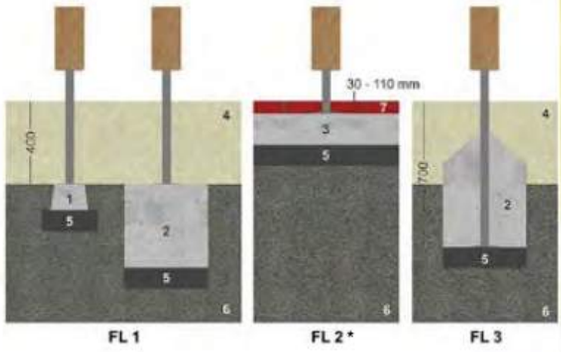
An overview of the foundation levels



1 Prefabricated foundation
2 Cast foundation
3 Concrete floor plate
4 Loose impact attenuation, e.g. sand
5 Base layer, approx. 10 cm gravel
6 Underground
7 Impact attenuation tiles

*on request

foundation levels eibiniland

no special ground requirements | with wet pour impact protection or floor mats | with floor heating: floor boards for weight distribution

1 subsurface | 2 wet pour impact attenuatio | 3 floor boards *on request

Impact attenuation

▶ page 632

Examples of commonly used impact attenuating materials, depths and corresponding maximum free heights of fall.

Material[1]	Description (mm)	Minimum layer thickness[2] (mm)	Largest possible free falling height (mm)
Turf/topsoil			< 1000
Bark	chopped bark of softwood trees, 20 mm to 80 mm grain size	200	< 2000
		300	< 3000
Woodchip	mechanically chopped wood (no wood materials), without bark and foliage share, 5 mm to 30 mm grain size	200	< 2000
		300	< 3000
Sand or gravel[3]	0.2 mm to 2 mm grain size	200	< 2000
		300	< 3000
other materials or other layer thicknesses	as tested according to HIC (see EN 1177)		critical fall height as tested

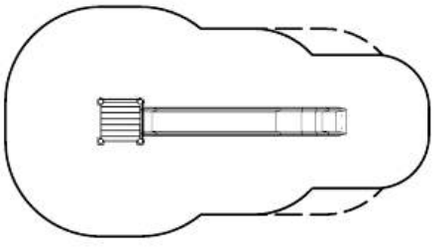
*1 Material carefully prepared for use on playgrounds

*2 For loose bulk material, 100 mm must be added to the minimum depth to compensate for displacement

*3 No silty or clay particles. Grain size may be determined using the screening procedure, such as EN 933-1.

Impact zone

Overview of the required shock absorbing features in the impact area according to DIN EN-1176-1.



dotted line: impact zone without impact attenuation
continuous line: impact zone with impact attenuation

Play values

- Building, constructing
- Observing, experimenting
- Throwing, catching, batting, shooting, juggling
- Running, climbing, jumping, dancing, romping, gymnastics, hand-over-hand climbing, crawling
- Crafting, painting, designing, working with tools
- Togetherness
- Social Integration
- Meeting, playing, communicating
- Touching, hearing, seeing, concentrating
- Doing puzzles, threading beads, promoting co-ordination
- Sliding
- Playing with water, sand, mud, natural materials
- Reading, arithmetic, writing, counting
- Sorting, arranging, keeping things safe
- 3+ Recommended age group
- Making music, singing, creating sounds
- Balancing, rocking
- Relaxing
- Inclusion NEW
