ITALIAN EXTERIOR DESIGNERS SINCE 1978

Unopiù, company leader in the production and distribution of design furniture and accessories for the outdoors, was founded in the heart of Tuscia over forty years ago.

The company mission is to furnish every outdoor area of the home with the same care and passion as is dedicated to the indoors, conceiving and creating elegant functional areas where relaxing inspirational moments may be enjoyed in true Italian style.

The company offers a “total look” for any type of ambience, from the urban balcony to the grand gardens of great villas.

Thanks to complete collections of furniture, structures and accessories, Unopiù can satisfy any style requirement the customer may have, from the most traditional design to the most modern.

All Unopiù creations are made to last, without losing any of the technical or quality characteristics that have become the company trademark. Materials are selected for their unrivalled quality and resistance to weather conditions, even the most extreme.

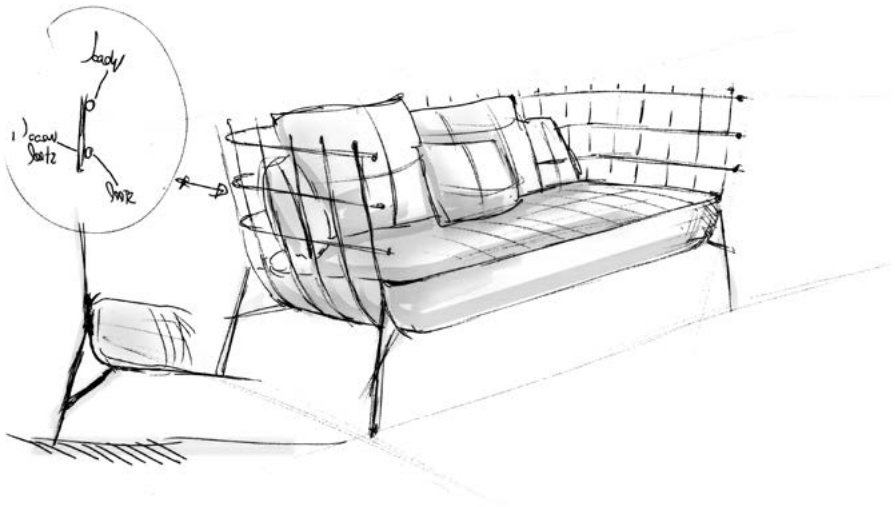

Quality

All products are made to last, without losing any of the technical or quality characteristics that caught your fancy for Unopiù in the first place.

Our quality is synonomous with Italian design, craftsmanship, passion and attention to every small detail: making every Unopiù product unique and exceptional.

Design

For Unopiù, to design and develop projects means to interpret the history and evolution of outdoor living in Italy and Europe, representing the stylistic soul and raw materials that have distinguished the company over the years. Being contemporary nowadays means understanding the project tensions of today while not forgetting that when we speak of rapport with outdoor areas, our roots and traditions must not be overlooked. It is for this reason that all of our collections are created with a precise DNA, consistent with the forty year plus history of the Company.

All Unopiù products are designed by qualified professionals from the Company's Research and Development Department, or are signed by important designers who have collaborated with Unopiù over the years like Adam Tihany, Ferruccio Laviani, Meneghello Paolelli Associati, Michele Bönan, Paola Navone, Marco Acerbis, Matteo Thun, Andreucci & Hoisl, Carlo Martino, Studio Adolini, Marco Piva, etc... They are all famous designers and professionals in the field who have consistently interpreted the spirit of the Company with class and originality. A special art of living has also emerged from these partnerships that clearly defines Unopiù Style.

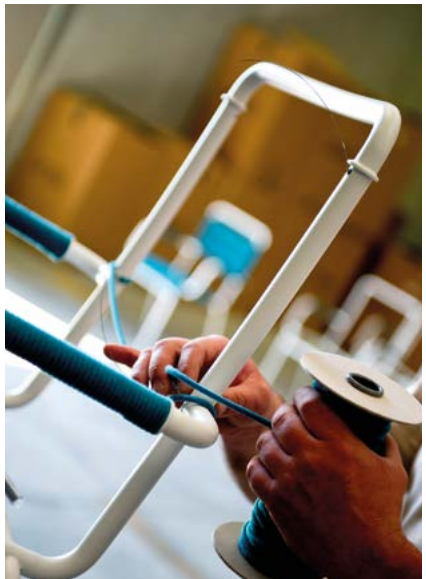

Innovation

Our ambition is to create truly unique personal and exceptional environments where the most precious moments of life can be savoured whether alone or in company. From the very beginning Unopiù has sought to continually update the world of outdoor furnishing, uniting style, innovation, research and passion.
For this reason every product launched on the market is the fruit of a concept whose roots are consolidated in decades of history.

Manifacture

All Unopiù furnishings stand out for the excellent quality of their raw materials, selected from the very best to withstand extreme climatic conditions, as well as for the craftsmanship, the refinement of the design and for Italian creativity.
Unopiù furnishings are the fruit of over forty years' experience that has always sought beauty and harmony among the wisest and most masterful artisans as well as an innovative spirit which transforms into avantgarde production techniques. In this way unique products are created that are longlasting and keep their value over the years.
In order to satisfy every aesthetic need the range goes from a more traditional style to the contemporary, from teak to metal, from synthetic fibre to cord, maintaining the quality of design, the excellence of the materials and the durability of the products unchanged.

Tradition

With over 40 years in business, Unopiù is an Italian company that is well known all over the world. Its taste, top quality materials, elegant refinement and style can always create that unique atmosphere in outdoor furnishing. In fact our name is inspired by the company mission: to make “one more space” in the outdoors of our homes, whether it be a garden, a patio or an urban balcony, making it livable and welcoming every day of the year.

Maintenance

All Unopiù teak furniture is made for outdoor life and needs no particular maintenance. The wood surface is rich in oily resin which oxidizes when it comes into contact with the air, protecting the inner wood and giving the furniture a beautiful silver-grey hue. Should you wish to go back to the original orange color, suffice to wash and dry the piece and rub it with a cloth soaked in a few drops of teak oil.

Craftsmanship guarantees attention to every minor detail and the creation of unique products.

Materials

Today the fusion between outdoor and indoor style is more and more evident, although the outdoor product must seek and use materials with unique characteristics for outdoor durability. Unopiù materials are always chosen for their incomparable quality of resistance to all weather conditions, even the most extreme.

Teak

Teak wood is a material of excellence, famous all over the world for the warm beauty of its surface grain and its excellent physical characteristics. It is in fact a robust, waterproof wood, resistent to salty conditions and the elements. For its furniture production, Unopiù uses only the most valuable and durable teak from Indonesian forests, and only that considered the highest quality from the centre of the trunk. Quality and ecosustainability: Unopiù teak only comes from certified, guaranteed, controlled government plantations, where each tree cut is replaced by a new one.

Polished mahogany

Sapelli mahogany is well known as a very solid, compact and easy to work material that for centuries has been used for fine furniture, luxury flooring and musical instruments. Its coloring has a strong visual impact and a grain interlaced with elegant shades from reds to dark browns that tend to darken over time. Even though it is naturally resistant to climatic conditions, the mahogany used by Unopiù is polished to bring out its elegance, making it pleasing to the touch and perfectly suited to even the most demanding uses.

Treated pine

Unopiù strutures are made in top quality nordic pine. This wood is particularly resistant and durable since it comes from trees growing in cold climates that can efficiently undergo pressure treatment in autoclave to 10 atmospheres.
The life of pressure treated quality wood is moreorless limitless, in that it is immune to insect attack, mould, fungus and the elements.

Iroko

Iroko is a wood with numerous properties: besides its remarkable resistance to external stress and extreme conditions, it is characteristically manageable and easy to work. Its iridescent reflections are extraordinary. The chromatic nature of the younger wood varies from a strong yellow with shades of gold, to yellow brown, shades which tend to darken with age reaching an elegant final result with light-dark variagations. Commonly known as an "oily wood" due to its high resistance to water and humidity, iroko has excellent durability because its strength guarantees stability, solidity and resistance to distortion.

Synthetic cords

Some years ago Unopiù introduced handwoven polyolefin cord, a modern ecological material that guarantees both high performance and resistance to extreme weather. It also has a warmer aesthetic compared to synthetic fibre, both physically and visibly bringing to mind the softness of natural cord. Handwoven polyolefin cord offers the characteristics of the very best natural textiles like softness, pleasantness to the touch, and is practical but also has the durability of synthetic textiles. It has a new aesthetic and functional role with infinite possibilities of color nuances and melanges that produce a product with fine details and a wonderful finish.

Synthetic fibres
Unopiù patented WaProLace® fibre, a last generation synthetic material that is durable outdoors, maintaining its color and characteristics even under rainy, salty, chlorine, mould, parasite, fungal, bacterial and sun cream conditions. Biodegradable and recyclable, WaProLace® is light, tactile, doesn't absorb liquids, doesn't stain, is antistatic and easy to clean. It is also resistant to extreme winter conditions, as it is not affected by changes in temperature.

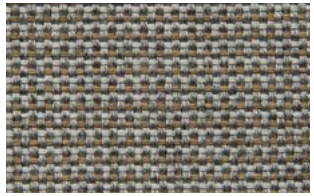

Leather
The leather used by Unopiù is hand worked according to an ancient Tuscan tradition: "vegetable tanning" which transforms raw hides into leather through the use of tree tannins, respecting nature and giving the leather precious unique and natural characteristics. The natural capacity of leather to age and change over time makes each product an exclusive and unrepeatable item, a Made in Italy masterpiece that is particularly soft and silky to the touch, thanks to the characteristic "bottalatura" technique.
The excellent hand stitching of Tuscan artisans completes the product design, incorporating precious design details.

Iron and stainless steel
Unopiù iron furniture is handmade and hand forged, as in times past. With galvanization the iron is treated with a technically superior type of painting. More ecological, because it eliminates the volatile part of the paint made up of polluting solvents and thinners, more efficient because it gives stronger cover, as well as producing a more elegant finish. Stainless steel is a material with exceptional technical and aesthetic characteristics and is extraordinarily durable.
The modern fascination for steel unites perfectly with its extreme versatility.

Aluminium
Aluminium is one of the most used metals, thanks to the combination of its excellent properties, including lightness. It also guarantees good protection from corrosion and requires limited maintenance over the years.

Textiles
Unopiù offers a vast range of textiles resistant to sunlight and adverse weather conditions: a wide range of 40 colors of different weights and finishes allowing the creation of infinite chromatic combinatons between seat, backrest and decorative cushions. These are 100% acrylic fabrics, solution dyed with stainproof and mouldproof fibres which stand out for their softness, freshness and pleasantness to the touch. Waterproof is a unique upholstery fabric composed of polypropoylene and polyester. It has a familiar, natural and elegant look thanks to its checked pattern. It is easy to clean with a machine wash or with bleach, permitting easy removal of mould thanks to its strong resistance and permeability to liquids.
It has a stainproof and waterproof finish resistant to 15 intensive washes.

"Velluto"
Unopiù's new velvet fabric is a unique line created through research into recycled plastic by manufacturer Fishbaker. It is a noble, top of the range collection of cushionware on demand for sofas, armchairs and sunloungers in 14 different extremely elegant and refined shades. It is a true velvet to the touch, warm, delicate and soft to touch but in fact 70% of the thread used comes from PET recycled bottles. This is a top quality ecological product that is weather and light resistant, flameproof and suited to any environment, internal or external, both public and private.

Sales Network

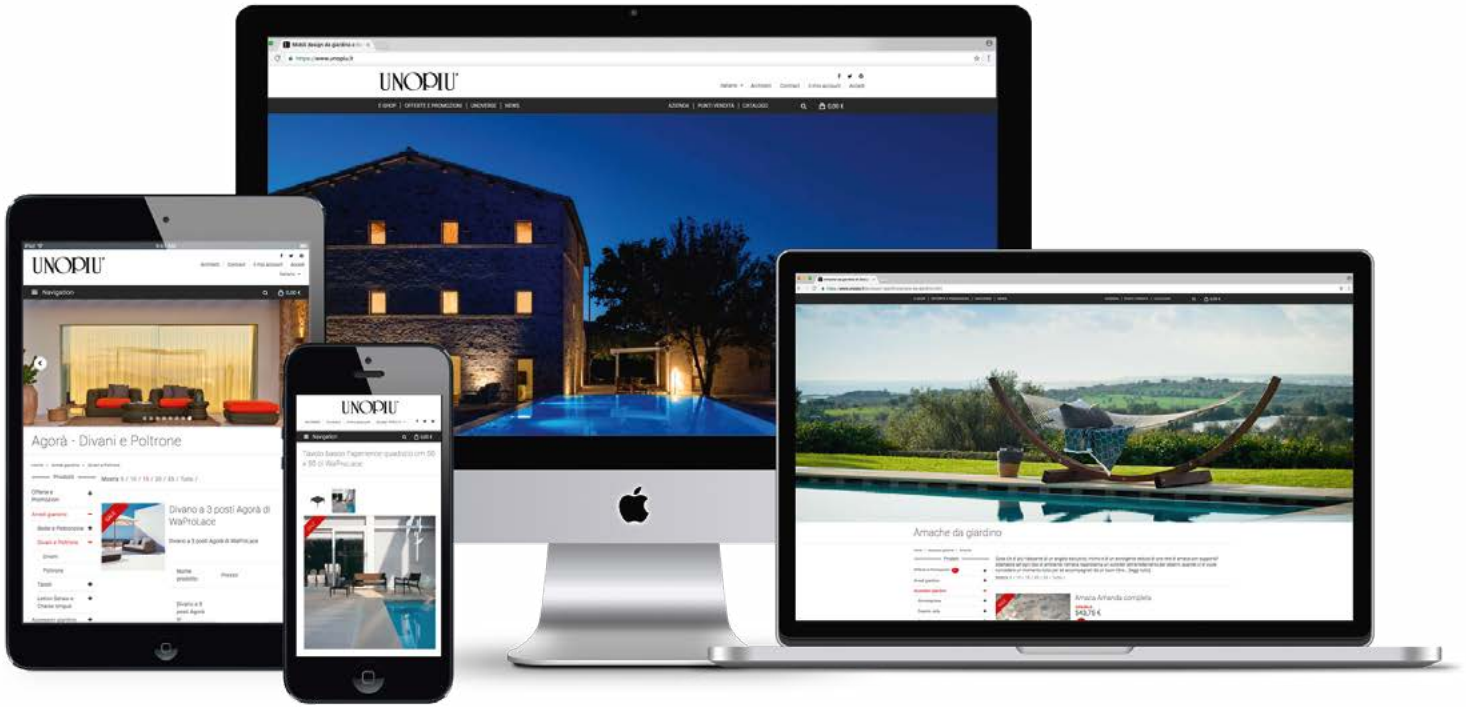

Unopiù owns numerous sales points, and also has franchisers, in Italy and around the world. The flagship stores in Milan, Rome, Paris, Cannes, Madrid, Munich and Berlin lead the way in the outdoor furnishing sector. They are important points of reference, guiding taste and setting trends.
At Unopiù stores one can clearly feel the quality of the wide range of products and take advantage of the personal assistance of dedicated staff, who are always ready to give advice and satisfy customer needs.
The stores owned by Unopiù are supported by a constantly expanding network of selected agents and representatives covering 5 continents.

Unopiù furnishings can easily be purchased from the privacy of your own home. Full of ideas, settings and available in all languages, the Unopiù website has a simple and intuitive interface. It is a veritable online shop open 24 hours a day 7 days a week, allowing customers to keep abreast with the latest news and to make purchases easily and safely.

FIRE TABLE

NEW

ROMANTIC FIRE

A coffee table whose design is clean and linear in graphite aluminium with teak slats that is perfectly suited to any outdoors. An ephemeral yet enchanting product that alone gives character to any environment and brings life to magic evenings or romantic encounters, thanks to the primordal magic of fire that becomes design in movement. The clean, odourless flame inserted in the centre of the table, thanks to an ethanol bowl protected by two glass panels, becomes the star of the scene. It is possible to substitute the brazier with a stainless steel bowl that creates an ice bucket, a flowerpot holder or an odds and ends container integrated within the table.

Fiery
A flame for special evenings, either alone or in company

Characterizing
A special coffee table that matches diverse furnishings

PANAREA

DESIGN BY ANDREUCCI & HOISL

MUCH MORE THAN JUST A SUNLOUNGER

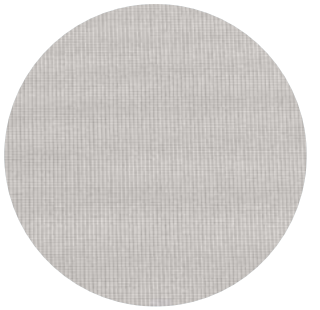

The Panarea sunlounger is made in an innovative techno fabric that combines the durability of PVC with the softness of woven polyester chenille, the structure is aluminium.
In 2020 the collection is enhanced with a new coffee table in white or bronze aluminium.

Aluminium
Generous width guarantees a solid structure

EXPERIENCE

REFINED VINTAGE STYLE

A clean design that is finely crafted though never extreme is the main characteristic of this collection. The fusion of graphite coloured aluminium naturally blends with handwoven antique brown WaProLace® synthetic fibre to create an elegant chromatic composition.
In 2020 the collection has been enhanced with a new rectangular table with tapered legs and a top with elegant symmetrical grooves, as well as a new small armchair with an embracing curved backrest.

DEAUVILLE

NEW

DESIGN BY MENEGHELLO PAOLELLI ASSOCIATI

INFINITE COMPOSITIONS

Modularity and elegance plus construction and aesthetic archetypes make Deauville an innovative line that offers infinite furnishing composition options. A line with a technological heart: 100% draining thanks to the new padding in Dry Feel®, a material with a completely open cellular structure that allows water and humidity to pass through quickly and effectively, ensuring maximum comfort in any humidity, guaranteeing excellent drainage and aeration.
In 2020 Deauville comes in 4 new shades: green, blue, dove grey, light grey.

Technology
An innovative 100% draining techno padding heart

C'EST LA VIE

NEW

DESIGN BY MICHELE BÖNAN

TIMELESS STYLE AND CLASS

C'est la vie is a new collection inspired by joi di vivre, presenting refined classic and sophisticated style furnishings using a material of excellence like polished mahogany reminiscent of elegant English furniture, but also the special finish in ships of old and life on the open seas. Created for nautical, pool and luxury spa environments or elegant homes, this line has strong character and attention to every detail, with shiny stainless steel feet that finish and decorate each piece. This collection has a timeless elegant refined style with ample extremely comfortable seats, forever guaranteeing maximum comfort.

MILTON

TEAK IN ALL ITS FORMS

The extensive Milton collection has always been particularly loved by those who seek traditions that extol the sinuous nature of teak wood, creating tasteful, timeless ambiences.
In 2020 the line has been enhanced by a square table that can be transformed into an up to 10 seater oval or round table, thanks to attached extensions. Every detail has been carefully considered as is demonstrated by the fine tapered legs which project outwards. It has a central aperture to accomodate some models of the Lipari umbrella.

Malleability
Answers every need from elegance to comfort

AURORA

ROMANTIC HAND FORGED LINE

For the Aurora series, Unopiù was inspired by the Umbro-Tuscan traditions of the late 1900s. It is an extensive collection that is defined by its graceful romantic lines. Aurora stands out not only for its beauty but also for the completeness of the collection: sofa, armchair, chairs, tables with peperino tiled tops and round coffee tables. An elegant sunlounger with wheels in either white or graphite completes the collection.

ALADINO

NEW

INDISPENSABLE BEAUTY

Aladino is a collection of carpets in handwoven techno synthetic fibre available in various colours and sizes, both standard and made to measure. Their original and decorative nature creates a warm atmosphere with style and personality in any environment. They are made in polyolefin fibre patented for outdoor use and are stainproof, mouldproof, resistant to fungi, bacteria, sunlight, humidity and chlorine. This fibre is non-toxic, certified Oeko-Tex Standard 100 class 1 and is fully recyclable.
Available in three sizes: 2x3 - 3x3 - 3x4
The alternative colours are Beige base with dark grey or Unopiù blue weft, or Dark Grey base with mid grey or beige weft.
The border finish varies between beige, dark grey, mid grey and sky blue.
Available exclusively from Unopiù retail stores, these rugs can be customized ordering from the proposed colours and border finishes.

A limited series of dinner, soup, and fruit plates in sets of three with the option of choosing from various original designs plus a salad bowl sold separately. Made in traditional ceramic, kiln baked 3 times, they are all handmade and painted in Puglia by local artisans with modern, lively, surprising designs that are exclusive to Unopiù.

THE ART OF THE TABLE

NEW

ITALIAN ELEGANCE

New accessories especially created to add finishing touches to your table while admiring Unopiù style. Elegant handmade glasses and candle holders in rigardin torsè that are mouth blown by Murano glass masters using traditional age old methods. Each item is an example of Italian artisanal excellence. These plates are accompanied by an elegant collection of table linen in Unopiù blue, the blue of the skies over an island in the Mediterranean. The 100% linen fabric maintains its bright uniform color thanks to the wash-up treatment, while the fibres remain elastic and durable with a soft velvety finish.

URBAN BALCONY

NEW

DESIGN BY MENEGHELLO PAOLELLI ASSOCIATI

MADE TO MEASURE DEHORS

The Urban Balcony design is young and fresh, interpreting urban living with new quality vision. It is a modular system whose versatility and modularity allow various modular creations, even on small city terraces, providing refined outdoor areas to be enjoyed all year round. An extra room in the open that can be organized as you wish, thanks to its modular structure in fine highly durable iroko wood. It can be fixed to either the wall or ceiling and comes with a wide selection of white aluminium accessories.

MÉRIDIENNE

SUN&RAIN

The Méridienne pergola is made in powder coated aluminium in white gloss or matt graphite and has adjustable (0° to 75°) aluminium louvre roofing called “Sun & Rain“. The orientation of the louvres, with a manual adjustment rod, allows the regulation of brightness, the passage of air and optimum protection from the rain.
The structure can be widened by adding one or more standard modules of the same depth connected with the appropriate gutter connector kit.
Roof must remain open in snowy conditions (louvres at 75°).
The Méridienne pergola can be enhanced with Caprice side panels and planters or with grilles and planters from the Solaire range, creating a veritable modular system that is versatile and adaptable to any requirement.

Pergola with “Sun & Rain” aluminium louvre roofing
Structure in powder coated aluminium in matt graphite or white gloss.

SHIBUYA®

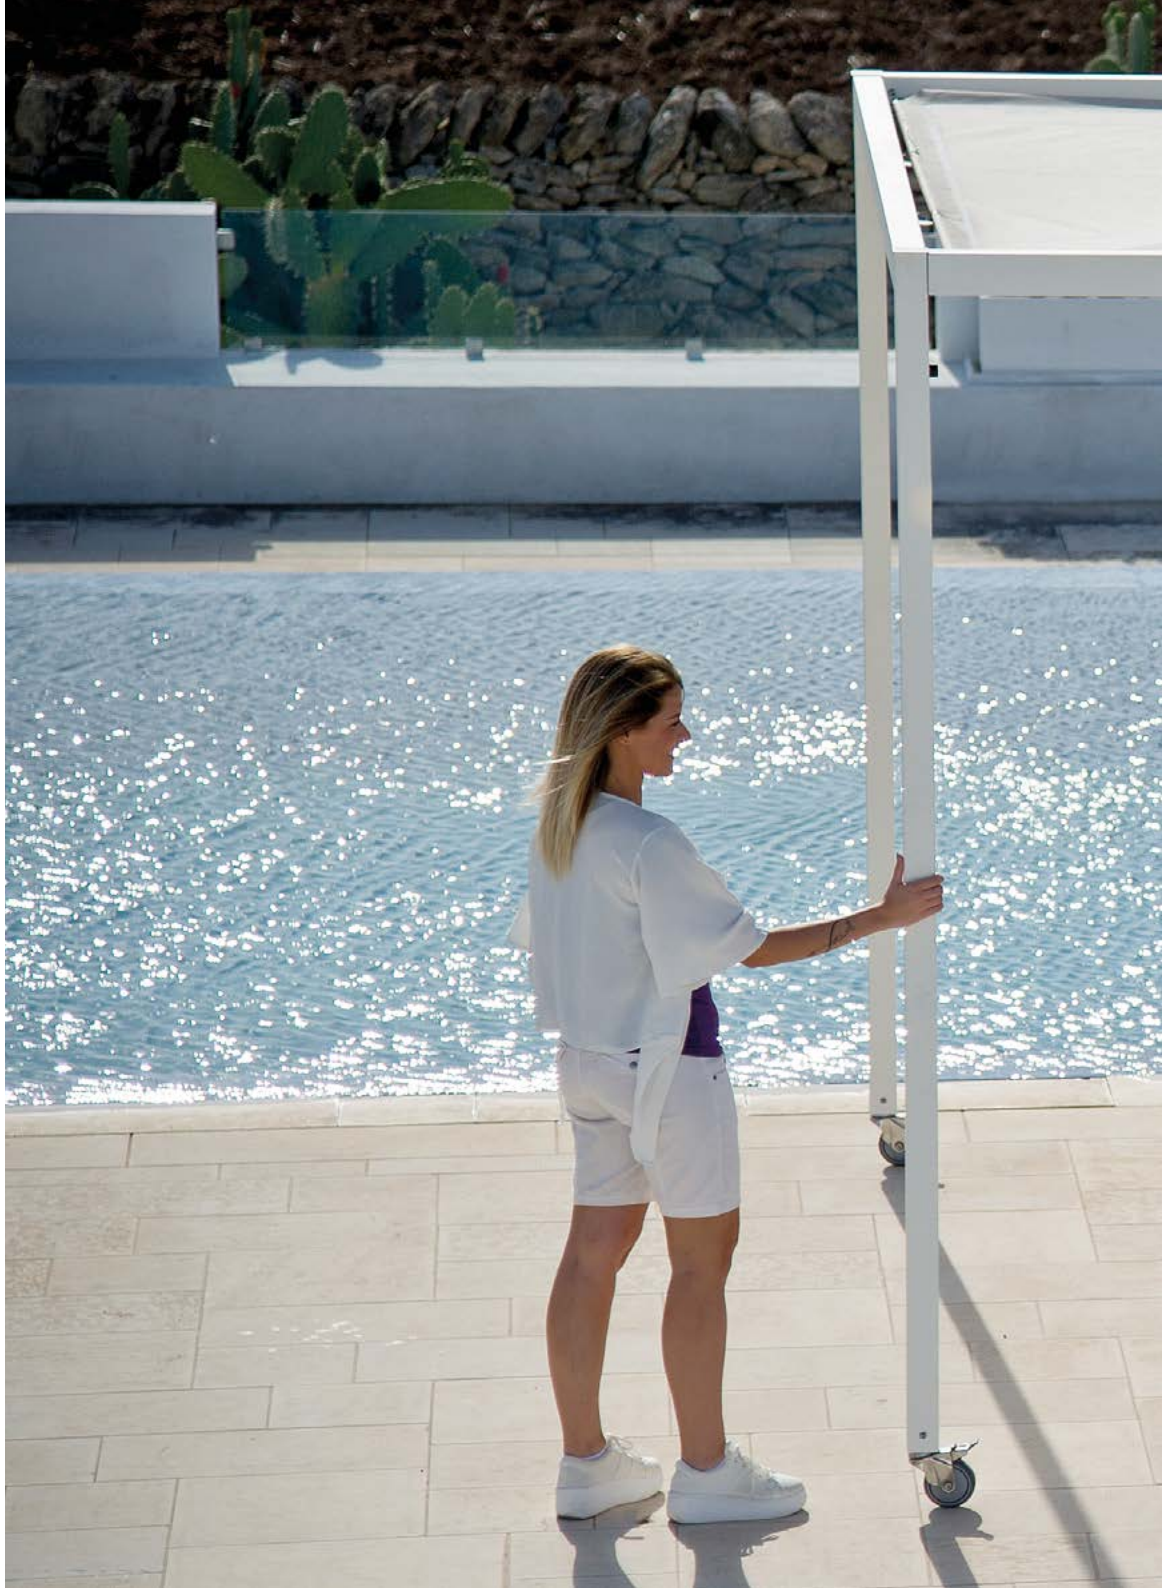

NEW

DESIGN BY FERRUCCIO LAVIANI

SHADE IN MOVEMENT

Shibuya is the first mobile pergola in the world. Thanks to its wheels it has revolutionized the very principle of the structure by introducing the concept of dynamism. It is composed of two cubic units that offer various levels of mobility and flexibility, adapting to any requirements. It is possible to purchase a fixed unit that can be anchored to the ground or a mobile one with four wheels, or two units (pergola plus extension) with six wheels. In the last case it is possible to extend and move the pergola wherever you might wish.
The structure is in aluminium powder coated in matt white or matt graphite and has blockable pirouetting wheels.
The mobile version has 10cm diameter wheels suited to any type of terrain. There are also blocking brackets for safety during high winds. The pergola can be completed with various types of roofing and can be enhanced with microperforated side blinds (40% polyester coated with 60% PVC) in hemp white.

SOLAIRE

VERSATILE PERGOLA, INTERLACING ELEMENTS

The Solaire collection in powder coated galvanized iron recalls the traditional Italian and Mediterranean style of creating shade, “rooms” in the open, intimate areas, the decoration of outdoor environments. It is composed of a series of freestanding and attached pergolas, a classic pavilion and the roof garden system. It is totally versatile, offering possible “customized” areas to fulfill any furnishing wish or desire.
Attached or freestanding Solaire pergolas are available with both flat or curved roofs and can be widened with 186 cm extension modules. Various types of roofing are available: fixed shade, roll shade and bamboo shade. The Solaire pavilion, complete with steel wire as support for climbing plants, is either round or octagonal. It too can be enhanced with grille panels.

PERGOLAS

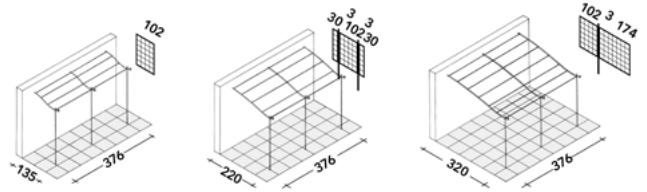

Dimensions given in the technical illustration refer to the maximum area occupied. The beam decoration overhangs the posts by approximately 20.5 cm in attached pergolas and by 18.5 cm in freestanding ones.

Posts are Ø 3 cm H 250 cm.
Thus the wall height of the curved attached pergola is:
- 280 cm for models 135 cm deep;
- 290 cm for models 220 cm deep
- 310 cm for models 320 cm deep.

TIBISCO

THE FASCINATION OF TRADITION

Tibisco is a line of dramatic pergolas and pavilions made in powder coated galvanized iron in graphite.
The pergola has a decorated front beam and is available in attached and freestanding verions that can be extended. It comes in different depths and widths and can be enlarged with extension modules single 186 cm and double 372 cm. Proposed roofing: polycarbonate sheeting, fixed shade, sliding shade and bamboo shades.
The pavilion, whose front beam is also decorated, found inspiration modelled on a structure from an ancient Cistertian monastery. The structure can be enhanced with spandrels and decorations at the base of the posts and with a waterproof white shade cover (39% polyester coated with 61% PVC).

	Set of 2 spandrels W 98 H 98 with fittings	CAFER2
	Decorative base post H 30 with bracket for fixing to ground	DBC

The relative measurements between posts are given in the technical illustration. The beam spirals overhang the posts by 18.5 cm.

PERGOLAS

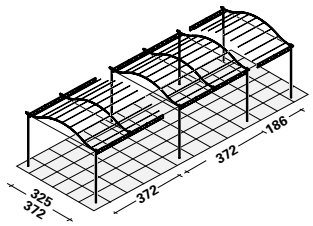

*Freestanding pergolas have 4 x 4 cm posts H 280 which must be fixed to the ground, set in concrete to a depth of 40 cm.

**attached pergolas have 4 x 4 cm posts H 240 with a wall height of:
- 280 cm for models 321 cm deep;
- 285 cm for models 369 cm deep;
- 292 cm for models 393 cm deep..

The polycarbonate version uses compact polycarbonate sheets 6 mm thick in grey fumé that guarantee protection from UV rays on both sides, ensuring limited heat accumulation whilst maintaining optimum brightness.

CAPRICE

PANELS AND PLANTERS TO ENCLOSE AREAS

Caprice allows the personalization of outdoor areas in a simple, functional and aesthetic way. Panels and planters of various dimension can be used alone or together with iron or aluminium pergolas. Caprice is in powder coated galvanized iron and is available in matt graphite or white gloss.

Each Caprice panel must be placed between two posts at a distance greater than 8.5 cm from the panel itself and fixed with the kit Ref. EFP4B or EFP4. 4 Aluminium Prestige couplings Ref. G55NCB (white) or G55NC (graphite) are needed to fix the Caprice planters to the posts making them 37, 109, 157 and 181 cm long and respectively compatible with 30, 102, 150 and 174 cm panels. A 42 x 42 cm corner unit is also available.

WINDOWS -DOORS

Supplement for additional window panel with polycarbonate panel (per SAU33P, SAU34P, SAD32P, SAD42P)	SPFSOR
Supplement for additional door panel with polycarbonate panel (per SAU33P, SAU34P, SAD32P, SAD42P)	SPPSOR
Supplement for additional window panel (per SAU215, SAU285, SAU355 SADSX215, SADDX215, SADSX285, SADDX285 SADSX355, SADDX355)	SUPFINSER

The request for additional windows and doors must be made at the time of ordering in order to substitute fixed panels. The above articles refer to the cost of the relative additions and vary according to whether the greenhouse chosen has polycarbonate side panelling included or not.

Orangerie greenhouses have stainless steel nuts and bolts. They come complete with transparent polycarbonate 6 mm thick roofing and can be ordered with or without the transparent 3 mm thick polycarbonate side panelling (should you desire glass). The door is a double door (110 x 202 cm) and the window (110 x 100 cm) is top hinged and both can be installed on either side.

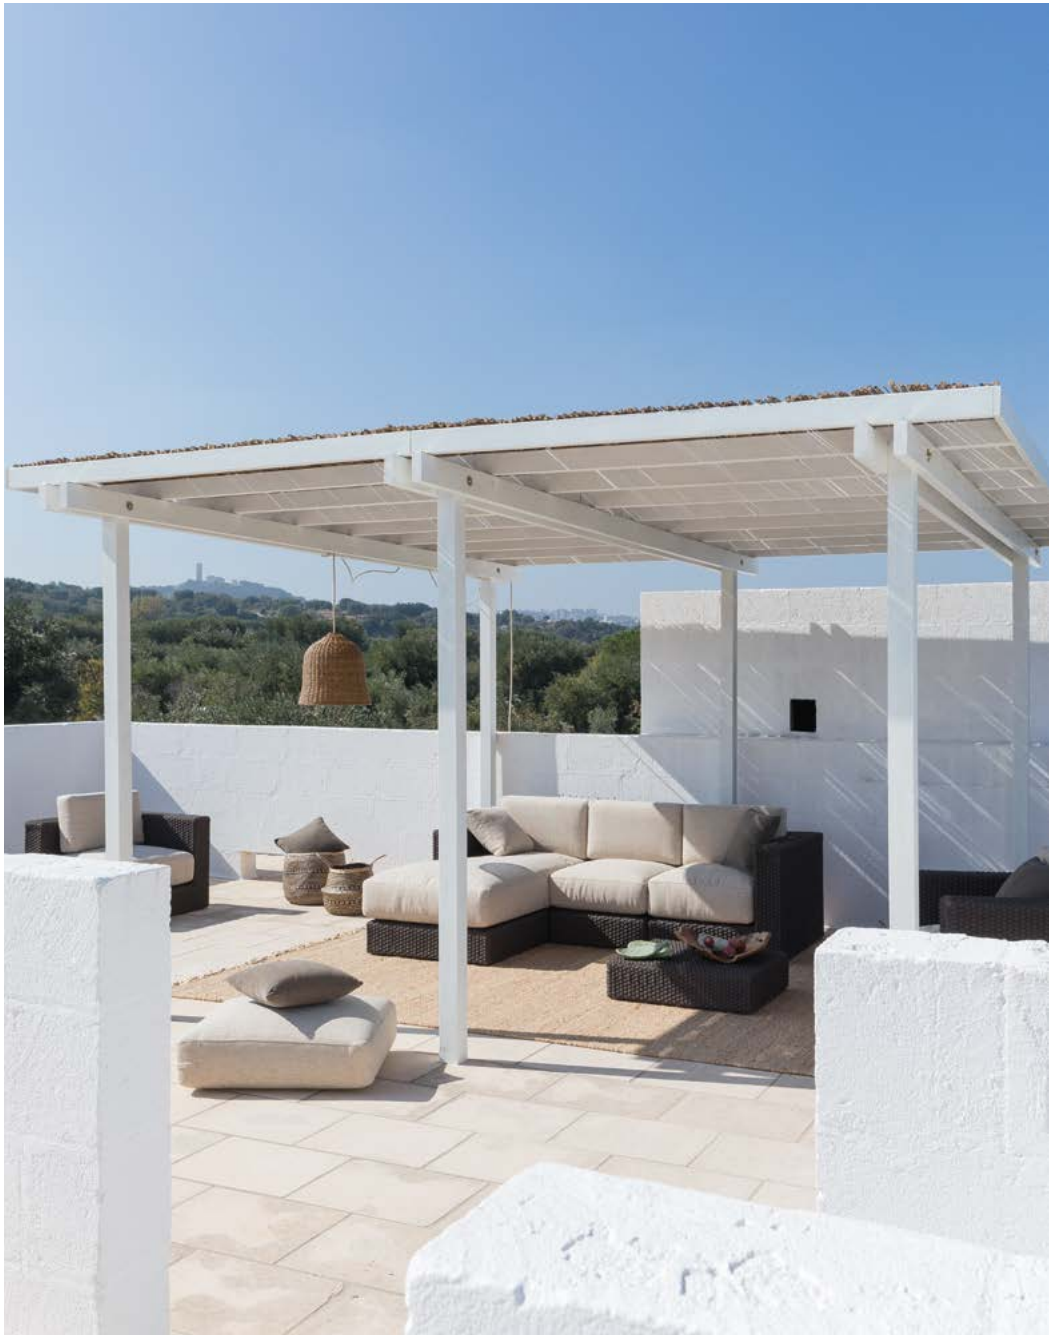

For Ref. SAU33P - SAU33 the temporary weight overload is 40 kg/m².

For Ref. SAD32P - SAD32 - SAU34P - SAU34 - SAD42P - SAD42 the temporary weight overload is 20 kg/m².

Powder coated galvanized iron graphite

CLASSIQUE

TRADITIONAL LINEAR PERGOLA

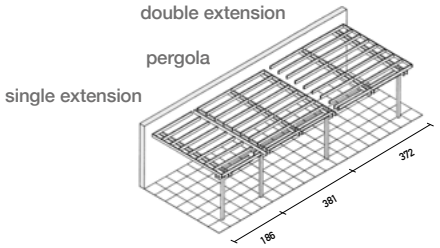

The Classique pergola, one of Unopiù's historic products, is hand crafted in treated lamellar nordic pine wood and available either freestanding or attached.
Available in two different depths and one width, it can be widened with one or more single extension modules. Thanks to the simplicity of its form and line, the structure is perfect for any environment, just as much in the limited space of a terrace as in a larger garden environment.
It can be personalized in dark walnut, teak or in colors from the Unopiù Color line and can be finished with various types of roofing.

Particular, quality relaxation
to suit your every taste

ROOFING

The wooden structures have a great variety of roofing both waterproof and shade: polycarbonate, matchboard with felt or bitumen roof shingles, bamboo shades, fixed or sliding shades.

POLYCARBONATE

Sheets of multiwall polycarbonate 6 mm thick complete with fittings	W 98,5 D 300	POL63
	W 98,5 D 400	POL64
Section “H” joint in polycarbonate	W 300	PROH3
	W 400	PROH4
Flashing in galvanized sheet metal painted brown	W 100	CG6
	W 220	CG7

MATCHBOARD

Treated matchboard roofing slats of varying lengths (price refers to a finished area of 1 m²)	mm 12,5 x 89	CO12P
	mm 21 x 107	CO21P
Roofing felt reinforced polyester slate flake, 6 m² rolls	brick red	GUAR6
	green	GUA6
Roofing felt reinforced polyester slate flake, 10 m² rolls	brick red	GUAR10
	green	GUA10
Waterproofing with bitumen roof shingles complete with fittings (price refers to a finished area of 1m²)	brick red	TECACR
	green	TECAC
Flashing in galvanized sheet metal painted brown	W 100	CG6
	W 220	CG7

Matchboard roofing is compatible with Classique pergolas to a maximum depth of 500 cm. The 12.5 mm thickness must be waterproofed only with roofing felt, whilst the 21 mm thickness can be waterproofed with roofing felt or bitumen roof shingles. Pitch: 2% minimum with roofing felt, 18% minimum with bitumen roof shingles.

BAMBOO SHADES

Shade kit made with bamboo canes of varying diameter (from 1 to 2 cm) connected by a stainless steel wire. Kits are supplied complete with fittings.

Bamboo shade	W 185 D 250	BAMR

Compatible with the following pergola and extension codes	
PW220EX - PW283EX - PW349EX - PA326EX	COBAM2L
PW220 - PW406EX - PW506EX - PA392EX - PA449EX	COBAM3L

UNOPIÙ COLOR

AND MAINTENANCE

UNOPIÙ COLOR

To characterize an ambience with different tones, pandering to one's own taste and furnishing needs, use Unopiù Color water based paints. From natural tones like teak and dark walnut to true colors: white, graphite and English green.

Tin Unopiù Color "Transparent" 2.5 litres	Dark walnut	UCNS
	Teak	UCP
Tin Unopiù Color "Pittura" 2.5 litres	White	UCB
	Graphite	UCG
	English green	UCV

Unopiù pays particular attention to protocols adopted for the treatment of wood, using substances without chrome or arsenic, substances prohibited by the norms of environmental protection. All wood structures photographed in the Catalogue have been treated with Unopiù Color.

SALENTO

THE PERFECT SHADE

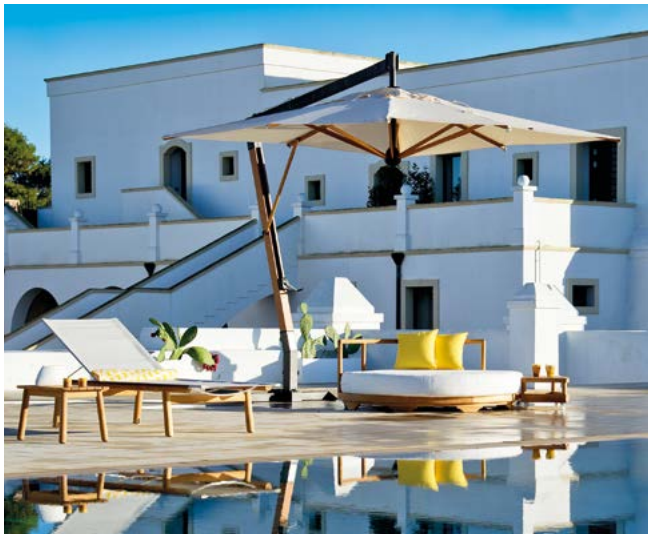

The Salento collection offers a series of umbrellas with side support shafts.
The most contemporary model unites the efficiency of an umbrella with the latest generation sun shade. When not in use the shade can be enclosed in a protective casing. The shade closes mechanically by means of remote control or manually rolled with a winch and manual adjustment rod.
A more classic square model is also available with side support shaft in two different materials, wood or aluminium in graphite or white with mechanical parts in top quality stainless steel.
It is easily opened by means of a winch.

	Set of 4 tiles 50 x 50 in pebble concrete (per OMABALB, OMABALG OMABALL)	BAOMCAL
	Taupe colored square umbrella shade cover	COOMABALL

Hardware stainless steel AISI 304. Inclination adjustment advisable from 5° to 20°. Wind-resistant to 45 k/hr. In the case of stronger winds it is advisable to close the shade. The balance and the angle of the umbrella are guaranteed by 10 cement blocks (size 50 x 10 x 16.5 cm, weight 18 kg each) sold separately, which are inserted into the base plate.
The umbrella structure also has holes for plugs to fix to the ground. The base plate comes with adjustable feet and can be used to hold decorative articles like pot-plants or planters, which besides giving greater stability provide added attraction

The balance and angle of the umbrella is guaranteed by 4 concrete tiles (50 x 50 cm approx. 20 kg each) which are inserted into the base. These tiles (Ref. BAOMC) are offered separately from the kit as they are easily found in any building yard or garden centre. The umbrella base can also be used as a stand for pots and planters increasing stability while providing added attraction

LIPARI

MULTIFUNCTIONAL PRACTICALITY

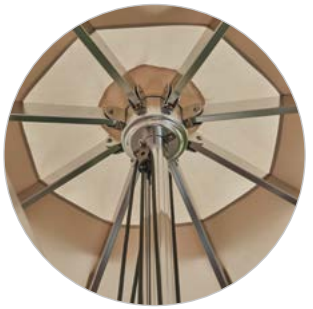

The new round Lipari bases in cement and a table in fine iroko wood with stainless steel hardware adjustable to four positions provide practical new uses for the classic garden umbrella. Ideal new relaxation areas can be created that suit any model of sunlounger or Unopiù furnishing.

Multipurpose

P. 12

Total immersion
in a fascinating dimension of relaxation

Three models with central shaft are available in various sizes, shapes and colors. Two have a larger central shaft, one in handcrafted wood and one in aluminium, opening by means of a cord and pulley. Round, square and rectangular versions are available and have a galvanized steel base. The third model, either rectangular or round, has a lighter aluminium shaft, can be tilted and opens manually by means of a winch.
In the round model the opening mechanism also works the tilt, the rectangular version is tilted by pressing a button on the shaft.

MANTA

GEOMETRIC SHADE

For years Manta, in plastic fabric for outdoors, has been the most practical and attractive solution for the creation of relaxing shady areas in the most diverse environments. Three models are available in hexagonal and rhomboidal shapes that are wind resistant to 50 km/hr.
The posts are in treated nordic pine while the shades are in plastic fabric for outdoor use (39% polyester coated with 61% PVC) in white (hexagonal sail) or in 100% white acrylic fabric (rhomboidal sail).

WOODEN SHEDS

GARDEN HUTS

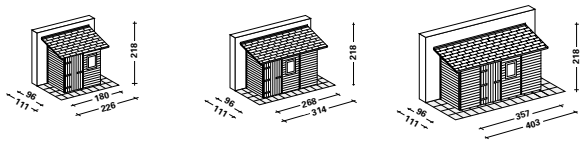

P. 262

Hand made in treated nordic pine the sheds are available in both attached and freestanding versions. Each one is supplied with flooring, door and window and can be painted dark walnut, teak or in colors from the Unopiù Color line. Every structure can be enhanced with supplementary door and window panels.
The roofing is in treated wood and bitumen roof shingles, brick red or green.

LAMINAR SECTIONS

Available in 2200, 2500, 3000 and 4000 mm lengths and used as load bearing posts in almost all Unopiù structures ensuring optimum mechanical performance.

section	length	Ref.
90 x 90	2200	PL9922
90 x 90	2500	PL9925
90 x 90	3000	PL993
90 x 90	4000	PL994

Available in various lengths and used as struts, in pairs, and as load bearing beams on structures with maximum spans of 4-5 m.

section	length	Ref.
60 x 150	3000	L6153
60 x 150	4000	L6154
60 x 150	4500	L61545
60 x 150	5100	L61551
60 x 150	6000	L6156

Available in various lengths and used with screens, for fi xing panels or in the construction of light structures.

section	length	Ref.
90 x 150	4200	L9154
90 x 150	5500	L9155

Curved sections describing a quarter circle with a 2.40 m outer radius and used to create and personalize a wide range of applications.

section	length	Ref.
90 x 90	2400	ARCO

CURVED LAMINAR SECTION

SECTIONS – BOARDS - SLATS

Available in various sections and in 3000, 3600, 3750 and 5000 mm lengths, used to fi nish almost all wood structures

section	length	Ref.
27 x 13	3600	T271336
27 x 27	3000	T27273
27 x 70	3750	T27703
27 x 95	5000	T27955
27 x 105	5000	T271055
27 x 117	5000	T271175
27 x 129	5000	T271295
27 x 142	5000	T271425

Special profi les used as either edging or trellis components, can also be used in many other applications.

section	length	Ref.
22 x 95	4000	PAVDOG4

Matchboard slats 12.5 and 21 mm thick and in two heights 89 mm or 107 mm and in various lengths, can be used for cladding and roofi ng.

section	length	Ref.
12,5 x 89	2700 - 4000	CO12P
21 x 107	4000	CO21P

TREATMENT

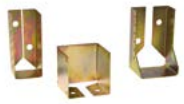

WALL BRACKETS

"U" brackets for fixing pairs of beams to walls; besides plugs and 2 flat washers, 2 bolts 12/70 for 45 x 117 beams and 2 bolts 12/80 for 60 x 150 beams are required.

width	height	length	thickness.	Ref.
90	110	150	5	SU90

Supports for securing both beams and single posts to walls complete with 4/60 screws. Two plugs must be used to fix to wall, as with the "U" brackets.

width	height	length	thickness	Ref.
90	150	60	3	SUP90C
90	90	90	3	SUP99C
60	150	60	3	SUP60C

FLOOR BRACKETS

Nerved brackets in galvanized iron to fix 90 x 90 posts raised from the ground, complete with hardware. Plugs for fixing to the ground excluded. To be used only with attached structures.

width	height	length	thickness	Ref.
100	160	80	5	SRU99C

Double raised brackets in galvanized iron to fix 90 x 90, 90 x 150 and 70 x 70 posts raised from the ground. The brackets are complete with hardware. Plugs to fix to ground are excluded.

width	height	length	thickness	Ref.
195	190	90	3	SRCD99C
255	190	90	3	SRCD915C
175	190	70	3	SRCD77C

Clamps used to fix 90 x 90 (SINT) posts to the ground. Ref. SINT1 is used to fix square corner posts where structures are to be closed laterally.

width	height	length	thickness	Ref.
102	606	60	6	SINT
102	606	60	6	SINT1

BOLTS - WASHERS

Bolts with flat and serrated washers are used to join wood sections together or sections and brackets. Used together with sleeves to provide a better finish.

Ø	W	Ref.
12	240	B12240
12	90	B1290
12	80	B1280
12	70	B1270

Ø	W	Ref.
10	110	B10110
10	100	B10100
16	85	MAN

Tension bolts: to connect load bearing beams to posts. Screw extruder: cylindrical with hole12 Ø. Washers: flat and serrated with 14 Ø and 17 Ø hole.

Ø	W	Ref.
102	240	A1BAR
20	40	BAR

description	Ref.
serrated washer Ø exterior 47 hole Ø 17	RD
flat washer Ø exterior 45 hole Ø 14	RP

Lag bolts: 10 Ø with hexagonal head. Lag screws: self screwing with hexagonal head.

Ø	W	Ref.
102	80	A1080
102	40	A1040

SPECIAL BRACKETS

SL brackets: to fix any section to the ground, 10 Ø bolts and plugs are required. SLP: universal brackets to use in a variety of applications.

width	height	length	thickness	Ref.
60	40	190	5	SL

5 hole brackets to create a "T" connection for almost all sections in the catalogue, complete with special zinc nails for better grip.

largh.	height	length	thickness	Ref.
35	-	150	3,5	S5FG
25	-	130	3,5	S5F

SP30-SP30M screen brackets: to fix various panels to posts or walls. SRI-SBA: to fix posts to railings or balustrades.

width	height	length	thickness	Ref.
-	-	-	-	SP30N
-	-	-	-	SBA
-	-	-	-	SRI

NAILS – SCREWS – PLUGS

Screws: galvanized and tropicalized, like all hardware, available in 7 sizes.
Nails: available in three sizes in packs of 100.

Ø	W	Ref.
1	25	G25
2,2	40	G40
2,7	60	G60
4	40	V44
4	60	V46
5	50	V55
5	80	V58
6	100	V610
6	110	V611
6	130	V613

Plugs TE plugs: 10 Ø, to fix wood to brickwork or concrete. TF plugs: 16 Ø in steel, to fix any bracket to brick or concrete.

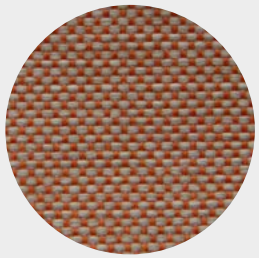

Ø	L	Ref.
10	160	TE
16	80	TF

Chemical plugs: special plugs which can bond with any material (hollow bricks, tufa, etc). Supplied in packs of 6 with installation accessories.

Ø	W	Ref.
16	110	TC6SP

COLOR COLLECTION

The Unopiù Color Collection comprises 40 different fabrics with different colors, weaves and weights. Thanks to the vast selection of carefully chosen shades one can satisfy any possible furnishing desire, a wide selection of matching colours offers the option of creating wonderful unique personal environments.

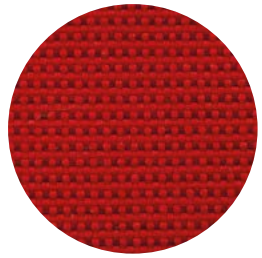

Designed for outdoor use, these solution dyed fabrics with the very latest manufacturing techniques are durable, stainproof, mouldproof, breathe and are particularly resistant to ultra violet rays. They all offer the same softness to touch as natural fibres.

The new waterproof fabric is the only one made of polypropylene and polyester.

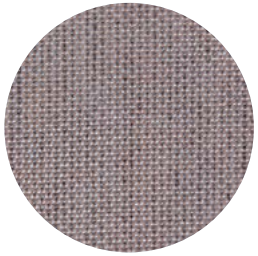

The square weave creates natural elegance, is 100% waterproof and can be either hand or machine washed.

UK Colour Collection
For the UK market, almost all our cushions are produced according to the British Standards, in terms of fire resistance regulation. For prices and fabrics, please refer to the 2020 price list.

Complete the cushion article code with the code color of the desired colour.e.g. AGCUAN + 109 = AGCUAN109 is the code color for a sand coloured cushion for the Agora corner module in WaProLace.

VELLUTO

Unopiù's new velvet fabric is a unique line created through research into recycled plastic by manufacturer Fishbaker. It is a noble, top of the range collection of cushionware on demand for sofas, armchairs and sunloungers in 14 different extremely elegant and refined shades. It is a true velvet to the touch, warm, delicate and soft to touch but in fact 70% of the thread used comes from PET recycled bottles. This is a top quality ecological product that is weather and light resistant, flameproof and suited to any environment, internal or external, both public and private.
